# Aid Defeat Deplored By Rogers

## McGovern Plans New Legislation

By Fred Farris

WASHINGTON, Nov. 2 (IHT).—Secretary of State William P. Rogers, calling Senate defeat of the foreign-aid bill a "very serious blow" that could weaken both U.S. foreign policy and President Nixon's negotiating powers, urged Congress today to repair quickly "the damage that has been done."

The secretary, who said he favored quick passage of a resolution continuing the aid program, reported that "reaction throughout the world has been extremely adverse and it has been very difficult to explain to our friends and allies."

Mr. Rogers thus stepped up the administration drive to press Congress into continuing the aid program. He spoke with reporters after an hour-long meeting with Mr. Nixon at the White House.

Yesterday, following a conference with the President, Defense Secretary Melvin R. Laird warned Capitol Hill that a halt in economic aid to South Vietnam could threaten the Vietnamization program and have an adverse effect on the withdrawal of U.S. troops.

But key Democratic senators today voiced opposition to the administration's plan for simply extending the present spending ceilings of $2.9 billion until a redrawn assistance program could be offered next year.

Meanwhile, Sen. George S. McGovern, D., S.D., announced that he would offer legislation today to resurrect the aid program but in a form confined mostly to economic assistance and omitting military aid funds to Greece and Pakistan.

Sen. McGovern, who met this

"THE LONDON LOOK" is the look of unusually heavy security as police and guards line part of queen's route to Parliament yesterday, in wake of the terrorist bomb attacks that have occurred in the city.

# Two Slain In Belfast Bomb Raid

## One Is a Woman; 35 Are Injured

BELFAST, Nov. 2 (UPI).—Gunmen bombed a Belfast pub, a police station and a clothing store next door today.

At least two persons died, one a woman, and 35 others—among them two policemen and 13 women—were rushed to hospitals, the army said.

The attackers burst into the Red Lion Pub, which is frequented mainly by Protestants, and a clothing store on either side of the Ballynafeigh police station, planted bombs in each and fought a brief gunbattle with a policeman guarding the station as they escaped in a car. Police said that the officer thought he wounded one gunman.

The gunmen who bombed the clothing store ordered everyone out first but not at the pub.

### 10-Second Warning

"Three gunmen rushed in and ordered us all to freeze," said John Mackie, 22, the bartender who was among the few to escape. There were about two dozen customers. "They put the bomb on the counter. As they backed out, one yelled, 'You've got ten seconds to get out.' Nobody stood a chance. I made it through the staff entrance. But everyone else ran for the front door. My God, it was horrible. The place just fell in on top of them."

The 5 p.m. blasts demolished the pub and the clothing store and blew down interior walls of the police station.

### Rescue Effort

Army troops, police, firemen and civilian volunteers clawed at the rubble in a search for survivors, heaving on ropes to pull aside heavy beams and chunks of concrete.

"We could hear cries and groans all around us," Mr. Mackie said, "and in the background fire and ambulance sirens all the time."

An angry crowd watched the search operations. Women wept. Men talked bitterly of marching to the nearby Roman Catholic Markets area, known as a stronghold of the outlawed Irish Republican Army.

Police announced that they had arrested one man for questioning

### UN's FAO to Invite China

ROME, Nov. 2 (UPI).—The ruling body of the UN Food and Agriculture Organization voted unanimously today to invite mainland China to apply for membership.

The 34-nation FAO council instructed Director General Addeke H. Boerma to invite an application by Peking for China's vacant seat in the Rome-based organization.

# 3,391 Dead Officially Listed In Indian Cyclone, Tidal Wave

NEW DELHI, Nov. 2 (Reuters).—The official death toll in the Orissa cyclone disaster was today put at 3,391 but it is feared that many more lost their lives.

The state government announced that it was rushing medical supplies to the stricken areas to prevent any outbreak of disease following the cyclone and tidal wave that swept into coastal areas of the state in eastern India late last Friday.

Senior army officers flew to the state capital, Bhubaneshwar, to assess how the military could help with relief work for the hundreds of thousands of homeless.

State officials said tonight that the death toll was about 6,000, while the revenue minister, Pratap Mohanty, told reporters that unofficial agencies estimated that 20,000 persons had died.

Authoritative sources quoted by the Press Trust of India said that damage estimates varied between $265 million and $395 million.

The officially listed deaths were recorded at a special control point at Bhubaneshwar. Two state politicians, Surendranath Dwiwedy and Bhagat Mahanty, claimed, however, that more than 15,000 persons were killed in one district alone near the town of Cuttack.

All India Radio reported that 2,500 killed in the Jambu area were East Pakistani refugees, although other sources said that there were only 600 refugees in the region.

The radio said that the port of Paradip would be unusable for a month and that several areas had been without food, water or electricity for three days.

Communications and rail services are still severely disrupted and many roads have been made impassable by trees blown across them.

The Orissa health minister, R.K. Patnaik, told reporters that 300,000 doses of anti-cholera vaccine were being rushed to the cyclone area and that the Red Cross had been asked to supply 10,000 blankets, milk powder and vitamin tablets.

# U.S. Women Say POWs Received Pentagon Book

NEW YORK, Nov. 2 (AP).—The North Vietnamese have distributed paperback copies of "The Pentagon Papers" to the 339 American prisoners they hold, according to two women who recently visited Hanoi.

Mrs. Amy Swerdlow and Mrs. Irma Zigas of the Women's Strike for Peace Movement said they were told of the book distribution during a 12-day visit.

They were refused permission to see American prisoners because of security measures taken after recent U.S. bombings, they told a news conference yesterday.

AP.

Queen Elizabeth on way to open Parliament yesterday.

Pageantry and Precaution

# Elizabeth Opens Parliament Behind Heaviest Security

LONDON, Nov. 2 (UPI).—A force of 8,000 policemen, many carrying guns, converted the *Houses of Parliament* into a fortress today to protect Queen Elizabeth from attack as she formally opened a new session of Parliament.

Police said that they mounted the heaviest security operation ever assembled to protect the queen because of two recent bombings in London and the possibility that the state opening ceremony might become the target for a third attack.

The policemen, in uniform and in plain clothes, surrounded the Palace of Westminster when the queen read the speech written for her, as is customary, by the government of Prime Minister Edward Heath.

Airmen and paratroop units joined police guarding the three-quarter-mile route from Buckingham Palace to Parliament as the queen, accompanied by her husband, Prince Philip, and Prince Charles, the Prince of Wales, rode in a horse-drawn coach.

### Government Plans

In the speech, Queen Elizabeth said that the Heath government:

- ● Is "determined that violence in Northern Ireland shall be brought to an end." It is "no less determined to continue efforts to establish political conditions... which insure the communities there an active, permanent and guaranteed role in the life and public affairs of the province."
- ● Hoped, "following the successful conclusion of negotiations, shortly to sign an instrument of accession to the European communities, after which legislation will be laid before you" on Britain's European Common Market membership.
- ● "Will work for good relations with the Soviet Union and the countries of Eastern Europe for peace in the Middle East and for improved relations with the People's Republic of China."
- ● Will continue to work toward "an end of the conflict in Indochina, and a settlement of the Rhodesian problem in accordance with the five principles" safeguarding the rights of majority Africans in the white-governed former British colony.

Queen Elizabeth said that the government shared public concern at the growth of violent crime and would introduce legislation to strengthen the administration of criminal justice.

At home, Queen Elizabeth said, the government would move to strengthen the nation's economy, cut unemployment and curb inflation.

At the end of the seven-minute speech, the queen, dressed in royal robes of ermine and velvet and wearing the crown of state studded with nearly 3,000 diamonds and an egg-size ruby, left the chamber of the House of

(Continued on Page 2, Col. 3)

# Opponents of Alaskan A-Test Seeking a Last-Minute Stay

WASHINGTON, Nov. 2 (AP).—Environmentalists looked to a federal appeals court today as probably their last hope in a battle to halt detonation of a nuclear warhead 6,000 feet underground on the isolated Alaskan island of Amchitka.

The Atomic Energy Commission says the blast, equal to five million tons of TNT, will go off no earlier than Friday.

Lawyers for the Committee for Nuclear Responsibility and six other groups planned to ask the U.S. Court of Appeals in Washington for a preliminary injunction halting the explosion.

District Court Judge George L. Hart jr. rejected their arguments yesterday that the explosion might kick off earthquakes and tidal waves, kill Alaskan and Canadian wildlife or scatter radioactive waste into the air. He turned down their request to temporarily prohibit the blast, which is the final test of the five-megaton warhead for the new Spartan anti-ballistic missile system.

After a week of tangled legal disputes, Judge Hart also ordered the Justice Department to turn over to David Sive, a lawyer for the environmentalists, secret government documents, which, Mr. Sive says, confirm environmental hazards of the blast.

Mr. Sive says that the government suppressed conclusions from four government agencies that the blast is dangerous. Under the National Environmental Policy Act of 1969, the government is required to consider the environmental consequences of anything it does and include them in an impact statement.

The appeals court already has turned down one request for a stay of the test.

### Bishops Oppose Test

WINNIPEG, Manitoba, Nov. 2 (AP).—The Anglican primate of all Canada, the Most Rev. Edward Walter Scott, said yesterday that the Anglican House of Bishops has voted unanimously to oppose the U.S. test.

# Bishops' Synod Starts Voting On Celibacy, Married Priests

VATICAN CITY, Nov. 2 (UPI).—Delegates to the Synod of Bishops met tonight to start secret voting on problems of the Catholic priesthood.

Vatican spokesmen said results will become public Saturday.

More than 200 churchmen were voting tonight on a 29-page Latin-language document containing 19 points on the doctrinal and practical aspects of the priesthood.

The document was hammered out in 19 days of general debate and committee meetings. When it was distributed last Saturday, prelates were ordered to keep it secret even from their secretaries.

However, a description of the document given by Vatican spokesmen indicated that its tone was highly conservative on such issues as priestly celibacy and even the proposed ordination of elderly married men into the priesthood.

Other subjects include the possible participation of priests in politics or non-church employment.

The bishops also voted tonight for a new 12-member Permanent Council of the synod—an institution established at the request of churchmen meeting at the 1969 synod.

Some prelates complained privately that the present council was inactive and said it had not met since January. This, they said, enabled the Roman Curia—the church's central government

(Continued on Page 2, Col. 1)

## Thant in Hospital

UNITED NATIONS, N.Y., Nov. 2 (Reuters).—Secretary-General U Thant was ordered to a hospital today for observation after he complained of a dizzy spell and weakness.

The head of the UN medical service, Dr. Michael Irwin, checked Mr. Thant's pulse and blood pressure and ran an electrocardiogram after the dizzy spell.

A UN spokesman said all the findings were within the normal limits.

Banners proclaimed Diem a "savior" of the South after it was split off from North Vietnam by the 1954 Geneva accords, which ended French colonial rule and left Ho Chi Minh and his Communist Viet Minh in control in Hanoi.

In a memorial service at the village of Honai, outside Saigon, a refugee center established by Diem for Catholics who fled Hanoi, there was a fervent plea that his body be unearthed, and that he be given a state funeral and a proper burial with a large headstone.

And in a graveside eulogy here, former Gen. Van Thanh Cao declared:

"President Diem died because he resisted the domination of foreigners, against the scheme to land massive foreign troops in Vietnam and against the attempt to widen a war which will destroy both parts of Vietnam."

Foreign Minister Tran Van Lam attended the ceremony. At a mass for Diem, Mrs. Thieu was in attendance and was seen weeping.

# U.S. Aide to Visit Russia This Month

WASHINGTON, Nov. 2 (AP).—President Nixon is sending Secretary of Commerce Maurice Stans to the Soviet Union in mid-November to discuss the potential for expanding trade, the White House announced today.

Presidential press secretary Ron Ziegler said the invitation was extended by Soviet commercial official Nicolai Patolichev. Mr. Nixon announced several weeks ago that he will go to Moscow in May to meet with Soviet leaders.

# Physics, Chemistry Prizes to Briton, Canadian

STOCKHOLM, Nov. 2 (Reuters).—Prof. Dennis Gabor, 71, British pioneer of three-dimensional imagery, and Canadian scientist Gerhard Herzberg, 66, today were awarded the Nobel Prizes for physics and chemistry.

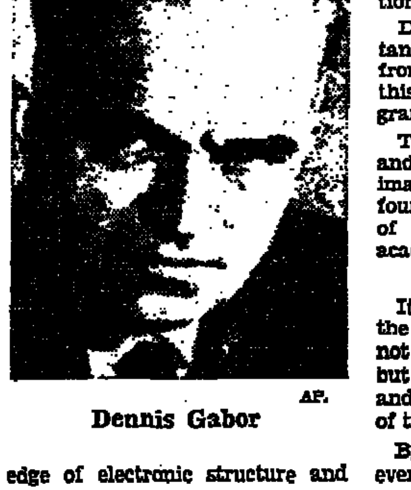
The prizes—the last of the 1971 Nobel series—are each worth *$86,400*.

Prof. Gabor, a native of Hungary who is now senior research fellow at the Imperial College of Science and Technology in London, received the physics award for his invention and development of the so-called holographic method.

Holography is a form of photography by which three-dimensional images can be obtained.

The chemistry prize to Dr. Herzberg, a native of Germany who recently retired after 20 years with the Canadian National Research Council, made him the first Canadian to receive that award—and the fourth to win a Nobel prize.

He was chosen by the Royal Academy of Sciences here "for his contributions to the knowledge of electronic structure and geometry of molecules, particularly free radicals." Free radicals are reactive fragments of molecules that take part in chemical reactions.



AP.

Dennis Gabor

Announcing the physics award, the academy here said that holography gave a sort of code containing all information about the details of an object and its position in space.

Dr. Gabor, whose most important papers on the method date from 1948, 1949 and 1952, called this form of registration a hologram.

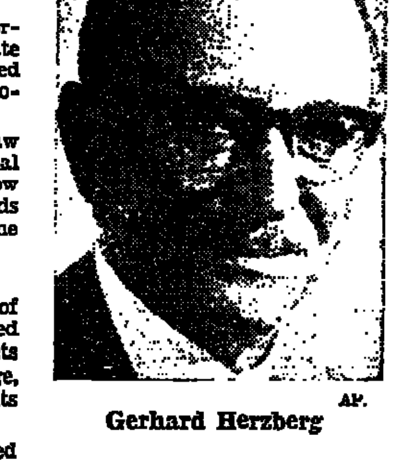
The scientist clearly foresaw and indicated three-dimensional images and his methods have now found applications in many fields of physics and technology, the academy added.

### Events of Time

It said that with the advent of the laser, holography was used not only with stationary objects but with objects which change, and thus for examining events of time.

By registering high-speed events, it has applications in plasma physics, gas dynamics and ballistics, and because of its high-volume storing capacity, it has been applied in data technique.

Work is also under way on acoustic holography, which it is hoped can be used in medical diagnosis, the academy added.



AP.

Gerhard Herzberg

Apart from his scientific work, Dr. Gabor has taken a keen interest in the social implications of technical advancement and

(Continued on Page 2, Col. 7)

# *Four African Heads of State In Israel on a Peace Mission*

TEL AVIV, Nov. 2 (UPI).—Four African heads of state arrived here today in a bid to bring Israel and Egypt closer together.

President Zalman Shazar, Premier Golda Meir, members of her cabinet and the entire diplomatic corps were on hand to greet the Nigerian head of state, Maj. Gen. Yakubu Gowon, and Presidents Leopold Senghor of Senegal and Ahmadou Ahidjo of Cameroun at Lydda International Airport.

President Joseph Mobutu of Zaire, formerly the Democratic Republic of Congo (Kinshasa), arrived an hour after the three other heads of state.

Acting as spokesman for the group, Mr. Senghor told his Israeli hosts, "Our wish is to try to find in these talks a way to help the people of the area in the search for peace.

"Africa decided at the last meeting of the Organization of African Unity, at Addis Ababa, to send us here as ambassadors of peace," he said.

### A New Peace

"We hope to help to create a new peace in the Middle East," he said. "We have no intention of trying to replace the big powers or even the United Nations' [special envoy] Gunnar V. Jarring. The basis for our search for a settlement will be United Nations Resolution Number 242."

The resolution calls for Israeli withdrawal from Arab territory, and a declaration of non-belligerency by the Arabs, among other things.

Soon after a 21-gun salute and the playing of national anthems, pink and blue leaflets fluttered from the balcony of the airport down among diplomats standing before a red carpet.

The leaflets, distributed by the Jewish Defense League, protested the Israeli government's welcome of Gen. Gowon, saying he "believes in and has practiced the use of genocide in the Nigerian civil war in which nearly the entire population of Biafra was massacred."

A police spokesman said later that four members of the league were arrested on the airport balcony.

Israeli officials said the government hoped the presidents would limit themselves to bringing about peace talks with Egypt rather than recommending their own peace formula. Israel rejects all outside attempts to put peace proposals before Jerusalem and Cairo.

After four working sessions with Mrs. Meir and members of her cabinet, a state dinner and a reception, the African statesmen will leave for Cairo Friday.

## Dayan Discloses Guerrilla Tolls

JERUSALEM, Nov. 2 (AP).—Defense Minister Moshe Dayan disclosed today that Israeli forces have killed 37 Arab guerrillas and arrested 361 suspects in the occupied Gaza Strip in the past three months.

Replying to questions in the Knesset he said that in the past six months another 37 guerrillas were killed infiltrating from Syria and Lebanon.

Gen. Dayan also said 3,687 guerrillas are held in Israeli prisons.

# Bishops' Synod Starts Voting On Celibacy, Married Priests

(Continued from Page 1)

—to set the tone of the synod working papers, without full control by the bishops themselves.

After tonight's voting, the synod presidency appointed eight prelates to count votes on the priesthood document and three prelates to tally the votes for the new council.

On the priesthood document, delegates could vote "placet" (it pleases me), "non placet" (it does not please me) or "placet iuxta modum" (it pleases me with reservations). In the last case, prelates were obliged to put their reservations in writing.

The scrutiny committee was charged with compiling all reservations into a single document for another vote later in the week.

The results of the synod are not binding on Pope Paul VI, but Vatican sources said he "certainly" would consider the views of delegates.

### Ukrainians Defiant

ROME, Nov. 2 (AP).—Ukrainian Catholic bishops formally professed devotion to Pope Paul VI today but refused to disband a synod convened in defiance of a Vatican ban on such a meeting.

They said they were acting within rights granted them by the Second Vatican Council.

Jozef Cardinal Slipyi — the Ukrainians' "major archbishop" convened the synod Sunday night with 16 other Ukrainian Rite prelates from North and South America and Europe.

The Ukrainian bishops claim they have a right to hold such "legislative" assemblies under Cardinal Slipyi even though he is absent from his diocese in Lvov, in the Soviet Ukraine. The cardinal was exiled to the Vatican in 1963 after his release from a Soviet prison camp.

The Vatican says that the power to conduct such synods is restricted to the territory of the Ukrainian Rite—the Soviet Union. It says Ukrainians elsewhere are under the direct jurisdiction of the Holy See, not of Cardinal Slipyi, who has tried and failed to be named a patriarch.

## Volpe Sees Crisis In Fare Talks Failure

BUCHAREST, Nov. 2 (AP).—Secretary of Transportation John A. Volpe expressed great concern today about the breakdown over the weekend of talks among the world's major airlines on the North Atlantic fare structure.

Mr. Volpe said, "I would consider it a crisis if something doesn't develop by the end of the year."

Mr. Volpe was in Romania to sign a memorandum of understanding on research cooperation with the Romanian Transport Ministry.

A LOT OF LITTLE THINGS ADD UP TO THE FINEST HOTELS IN BERLIN, DÜSSELDORF AND MAINZ.

# Well-Guarded Queen Opens Parliament

## Heaviest Security In Fear of Bombings

(Continued from Page 1)

Lords on the arm of Prince Philip.

Accompanied by Prince Charles, they followed the Earl Marshal, the Duke of Norfolk, and the Lord Great Chamberlain, the Marquess of Cholmondeley, who walked backwards from the hall, a tradition passed on from Norman times.

The queen's uncle, Admiral of the Fleet Earl Mountbatten of Burma, Princess Margaret and her husband, the Earl of Snowdon, and the Duke and Duchess of Kent followed in the procession of dignitaries.

Shedding her robes and crown in an anteroom, the queen walked out of the House of Lords and into the royal carriage. The sky was cloudless, the air crisp.

### Close Guard

Police and guardsmen stood at three-foot intervals. Special Branch detectives scanned the roof of Westminster Abbey, across the street, where five workmen peered from scaffolding.

Police restricted persons near the House of Lords entrance to those with press or other special passes.

Police turned away one member of Parliament, who forgot his special pass, until senior officers identified him.

The queen appeared undisturbed by the precautions. The Big Ben clocktower intoned the noon hour as she was driven past Parliament, back to Buckingham Palace, smiling and waving to flag-waving and cheering onlookers.

Following the ceremony, Mr. Heath led off the opening debate by promising that Britain, from now on, will be able to take a growing role in shaping the future of Europe.

The new session of Parliament is expected to produce months of hard-fought battles on legislation aimed at bringing Britain into the Common Market.

Labor party leader Harold Wilson attacked the queen's speech as "complacent, obsessional and wrong-headed."

He vowed that the Labor party will examine the Common Market legislation "clause by clause, line by line, hour after hour, day by day, night after night."

## Big Moon Area Was Mapped By Lunokhod

MOSCOW, Nov. 2 (AP).—A Soviet scientist said today that Russia's robot moon vehicle, Lunokhod-1, mapped more than a half-million square yards of the lunar surface and collected valuable data which will help determine the moon's age.

Boris Nepoklonov, leader of the ground control team which steered Lunokhod around the Sea of Rains for ten and a half months, gave his assessment of the mission in an interview distributed by Tass.

"A wealth of facts were collected," he said. "We now have more than 500 lunar panoramas, over 20,000 television pictures, 25 chemical analyses of the ground and hundreds of probes of the physical-mechanical characteristics of the upper layer of the Sea of Rains.

"The overall area explored by Lunokhod-1 exceeds 80,000 square yards," he said. "And if we consider all details recorded in the panoramas it is possible to compile an adequate schema of the terrain covering an area of more than a half-million square yards."

## McGovern Sees UN China Vote As U.S. Victory

NEW YORK, Nov. 2 (AP).—A contender for the 1972 Democratic presidential nomination said today that the United Nations "made the proper choice" in voting to seat Communist China and oust Taiwan.

"I believe the outcome can be a substantive victory for the United States just as much as it was a victory for the supporters of the Albanian resolution," Sen. George S. McGovern, D., S.D., said at a news conference at the UN.

"It is in our interests for the People's Republic of China to assume its proper role in the United Nations. If this development produces nothing more than better understanding of the issues which divide us, it will begin at least to overcome two decades of myths on both sides . . ."

# *2 Die, 35 Hurt in Belfast Bomb Raid*

(Continued from Page 1)

in the incident but refused to say if he was the escaping bomber who was reported to have been wounded. When word of the arrest spread, the crowd shouted: "Give him to us! Let us deal with him."

The digging went on under floodlights and drizzling rain. Again and again, an army bulldozer pushed aside mounds of shattered bricks and beams and searchers moved forward to poke through freshly upturned rubble.

A fireman emerged from the rubble, his hands bloody from the digging. A first-aid man bandaged them and he went back to digging.

"We've no idea how many may be in there," a fireman said, gesturing with his bandaged hand at the wreckage. "We'll dig all night, brick by brick, if necessary."

Earlier, explosions severed the main Belfast-Dublin rail line and a Belfast youth employment center. The capital's largest police division threatened a strike unless the government rearms police with machine guns and armored cars.

Earlier today, British troops in Belfast came under fire from a gunman blazing away from behind a group of children. The shots missed and the gunman hurled a grenade, which failed to explode.

Police reported that a sniper's bullet went through a police vehicle in the Roman Catholic Lower Falls area but that none of the occupants was hurt.

In a continuing series of arrests, 10 men and a woman were taken into custody in three areas of Belfast.

## 50,000 in Italy Form New Church Labor Movement

ROME, Nov. 2 (NYT).—A new national Catholic labor movement was founded here yesterday following a break with an association that Pope Paul himself helped to create and later rejected.

The splinter association, called the Christian Workers Movement, appears to be more conservative and closer to the Roman Catholic Church than the original Christian Workers' Association.

Its basic aim is to "rediscover the authentic roots of social Christendom," the group's chairman, Carlo Borrini, said yesterday.

Founding members of the new movement are about 50,000 workers from all over Italy who have been gradually leaving the 7[illegible]-000-member association that was founded 25 years ago with the support of Msgr. Giovanni Battista Montini, who is now Pope Paul VI.

Msgr. Montini was at the time an aide to the late Pope Pius XII and supported a church-affiliated initiative that was committed to the solution of social problems.

## Pakistan Again Asks Thant's Aid For India Peace

UNITED NATIONS, N.Y., Nov. 2 (Reuters).—Pakistan yesterday renewed its call for UN Secretary-General U Thant to use his good offices to ensure peace between India and Pakistan.

Mahmud Ali, the head of Pakistan's delegation to the UN General Assembly, made the request at a meeting with Mr. Thant today.

Mr. Ali told correspondents after the meeting that the situation along the Indo-Pakistani borders had worsened recently, and added: "It could lead to war."

The Pakistani diplomat said he had asked Mr. Thant to visit both India and Pakistan to confer with the leaders of these countries so that he could formulate his own peace proposals.

Mr. Thant had said he would take up the Pakistani request with Indian Premier Indira Gandhi if he met her during her visit to the United States beginning tomorrow, Mr. Ali added.

# Rogers Calls Aid Bill Defeat 'Serious,' Asks Quick Repair

(Continued from Page 1)

morning with Secretary-General U Thant, told a news conference at the UN that his bill would eliminate what he called "the most objectionable feature" of the administration's aid program—military assistance, which accounts for about half of the funds requested.

But his bill would include a provision authorizing $385 million in credit for arms sales to Israel, said Sen. McGovern, a declared presidential candidate.

Mr. Laird, who left today for South Vietnam to assess the U.S. pullout in preparation for Mr. Nixon's promised mid-month announcement of further troop withdrawals, said again today that the aid program made Vietnamization possible.

The steady return home of American troops, he told newsmen, "has been made possible through the application of military assistance and foreign military sales." He said he was confident Congress would resurrect the aid program.

Mr. Laird said that the aid program had permitted removal of 342,000 U.S. troops from Vietnam since 1969 under the administration's Vietnamization program to shift the burden of defense to the Saigon government.

But Senate Majority Leader Mike Mansfield, who opposes the aid program in its present form, dismissed Mr. Laird's warnings as merely administration rhetoric.

The Montana Democrat said that there was no need for Congress to act hastily to revive the aid program, now scheduled to expire Nov. 15. Sen. Mansfield said the Agency for International Development already has more than $4 billion of past appropriations that it can use to keep the program going and pay staff salaries until Congress drastically redrafts the whole assistance program in a new bill.

The State Department disputed the Mansfield contention, saying that nearly all of the $4.7 billion in previously voted funds has been committed.

Spokesman Charles W. Bray said the aid agency would have to discharge 8,472 employees in the U.S. and abroad as of Nov. 15 unless action continuing the program was taken soon. About a third of these were foreign nationals, he said.

But Sen. Mansfield told newsmen today that he was ready to see the whole aid program ended if that is what is needed to force a total revision of the 23-year-old program.

Sen. Mansfield is known to prefer some kind of interim bill that would alter specific programs and money amounts, rather than a resolution merely allowing the program to continue its present course. Capitol Hill experts believe Congress could redraft such an interim measure and pass it in both houses before the Dec. 1 target date for year-end adjournment.

Chairman Allen J. Ellender, D., La., said his Senate Appropriations Committee would not approve any temporary extension of the aid program unless progress was made on "a shortened, revised version of our aid operations."

Chairman, J. William Fulbright, D., Ark., of the Senate Foreign Relations Committee said it was possible his panel would produce an aid bill by the end of this week or early next week, but he and other committeemen said they had no idea at present what it would contain. Sen. Fulbright said he favored an interim bill extending perhaps until next June to keep the program alive until major reforms can be developed.

Another committee member, Sen. Stuart Symington, D., Mo., said sarcastically, "The only thing [administration partisans] haven't said the defeat of foreign aid would do is cause smallpox."

Today, speaking with reporters at the White House, Mr. Rogers called "the action of Congress . . . a very serious blow to the foreign policy of the United States. We think it is essential that Congress act now to pass a bill which will be coordinated and balanced to carry on essential foreign policy."

The Senate rejection of the aid program, Mr. Rogers said, "weakens the President's powers in negotiations throughout the world." Not only would it endanger the Nixon Doctrine which pledges aid to Asian countries from which U.S. troops are withdrawing, Mr. Rogers said, but it would jeopardize the U.S. position at the Paris peace talks (implying a rejection of Vietnamization) and even the Middle East negotiations. There, he said, the United States has signaled Jordan that it would provide military hardware to help control internal threats.

Asked why he thought the aid measure was defeated, he spoke of conflicting emotions, frustrations and irritations in Congress, and conceded that the United Nations vote on China might have had some effect. He said there may have been a feeling in Congress that other nations of the world failed to appreciate what the United States has done with its aid over the years. The United States has spent more than $88 billion since 1948 on foreign aid.

### Latin Nations Disturbed

LIMA, Peru, Nov. 2 (AP).—Latin American delegates attending a meeting of 95 of the world's developing nations are reportedly preparing a resolution asking for a reversal of the Senate action halting the foreign aid program.

The proposed document would call for reversal of the Senate move as well as elimination of a 10 percent surcharge placed by the United States on certain imports, spokesmen said.

More than 1,000 delegates representing Africa, Asia and Latin America are meeting here to draw up a common position for presentation at the third United Nations Conference on Trade and Development, scheduled to be held in Chile next April.

## Connally Said To Assure Thais About U.S. Aid

BANGKOK, Nov. 2 (UPI).—U.S. Treasury Secretary John B. Connally told Thai Prime Minister Thanom Kittikachorn today that the Nixon administration would seek means to restore the foreign aid bill killed by the U.S. Senate.

Reporting on the Thanom-Connally meeting, Foreign Minister Thanat Khoman said Mr. Connally assured the prime minister that the United States would do its best to maintain aid to Thailand.

Mr. Thanat, who sat in on the meeting, said Mr. Connally thanked Mr. Thanom for Thailand's support of the U.S. position on the China question in the United Nations General Assembly.

Mr. Connally also assured Mr. Thanom that the United States would honor its commitments to Thailand, Mr. Thanat said.

# U.S. Jet Attacks Missile
# In North; 70th Strike in

SAIGON, Nov. 2 (AP).—A U.S. Navy fighter-bomber today carried out the 70th strike inside North Vietnam this year after two surface-to-air missiles were fired at it, the U.S. Command announced.

The command said there was no damage to the carrier-based A-6 Intruder in the exchange of missiles 105 miles north of the Demilitarized Zone.

The Navy plane fired one air-to-ground missile at the North Vietnamese site, the command said. Results of the attack were not announced.

### Ho Trail Bombed

The A-6 was on a bombing mission along the Ho Chi Minh Trail in neighboring Laos when the missiles were fired from a site 33 miles north of the Mugia Pass.

Many of the 70 air strikes inside North Vietnam this year have been triggered by American air attacks against the Ho Chi Minh Trail.

Yesterday, North Vietnamese and Viet Cong gunners shot down two U.S. helicopters in the Central Highlands, raising American aircraft losses in the Indochina war to 8,004.

One crewman was wounded in the crashes of an OH-6 light observation helicopter 17 miles west of Pleiku and a UH-1 Huey transport 34 miles northwest of Kontum.

### Ground Fighting Lull

Ground fighting remained in a lull with only small clashes reported, but the U.S. Command said helicopter gunships killed 24 North Vietnamese and Viet Cong troops in the Mekong Delta.

U.S. B-52 bombers were again diverted to targets in Laos and Cambodia because of the low level of fighting in South Vietnam.

### Cambodians Break Siege

PRAKHAM, Cambodia, Nov. 2 (Reuters).—A Cambodian armored column today broke through encircling Communist troops to end a weeklong siege of this township straddling strategic Highway 6.

Before smashing through, the Cambodians had pounded the positions of the eight North Vietnamese and Viet Cong siege battalions for 24 hours.

The relief of Prakham, 56 miles north of Phnom Penh, was the government's first success in breaking up big Communist concentrations which have built up in the rear of the government's Highway-6 offensive.

More than 20,000 troops push-
ing northward along t

## U.S. Launching Pair Of Military Satellites

CAPE KENNEDY, Nov. 2 (UPI).—The Air Force made ready the nation's mightiest military rocket for the launching tonight of a pair of advanced military communications satellites designed to link Washington with U.S. forces across the Atlantic and Pacific Oceans.

The twin 1,100-pound spacecraft were scheduled for launching on a single triple-barreled Titan 3-C rocket. One of the drum-shaped satellites will be positioned in a near-stationary orbit 22,300 miles above the Atlantic and the second above the Pacific.

on House Proposal

# Panel Bars Nixon Bid centives to Exporters

ON, Nov. 2 (Reu- ate Finance Com- jected the admin- sal to provide tax U.S. firms to in- ports.

Long, D., La., the man, said that re- dministration pro- Domestic Interna- rporations (DISC) to 8 vote in the mittee.

aid, however, that his Senate panel the House-passed which modified tion plan in an effort to cut down the revenue-loss impact of DISC.

Under the administration proposal, U.S. firms forming a DISC would be allowed across-the-board tax deferrals for their profits as long as they were redirected into the DISC's export-related activities.

Under the modified House proposal, this tax deferral treatment is limited to the extent of the increase in the exports of the DISC over 75 percent of the level of their exports in the years 1968 through 1970.

The finance committee's action came as it continued work on President Nixon's Phase 2 tax legislation.

Sen. Long told newsmen that all of the finance panel's seven Republicans, plus Sen. Clinton Anderson, D., N.M., voted for the administration DISC proposal and that it was opposed by eight of the committee's Democrats.

In other action:

- The Senate Foreign Relations Committee approved the treaty for the return of Okinawa to Japan. The treaty will go to the full Senate for approval.

- The House voted last night to revamp the nation's farm credit system. One major innovation would permit the system to provide non-farm credit for the first time.

Federal land banks and production credit associations would be empowered to make non-farm housing loans in rural areas, defined as communities of up to 2,500 persons. The loans would be limited to 15 percent of the total outstanding loans for a given area.

- Sen. Edmund S. Muskie, D., Maine, said that America's rivers had become "little more than sewers to the sea," and urged approval of a multibillion-dollar program aimed at cleaning up the nation's waters by 1985.

Sen. Muskie made his plea as the Senate began consideration of a water pollution bill designed to eliminate discharges of pollutants into lakes and streams. The cost was estimated at more than $16 billion.

The legislation would maintain provisions in present law aimed at cleansing all waters in the country by forcing states to set clean-water standards acceptable to the government by 1974.

- The Senate Finance Committee voted yesterday to give President Nixon additional discretionary tools, through the tax system, to bring pressure on foreign governments to follow the international economic policies desired by the United States.

Specifically, the committee said the President could reimpose the 7 percent excise tax on automobiles manufactured in any country that discriminates against the importation of American-made cars. The committee did not define precisely what constitutes discrimination.

Many countries, prominent among which are Japan and France, impose taxes based on the weight, wheelbase or horsepower of automobiles and thus effectively raise the cost of large American cars.

# Mariner-9 Rolls, May Have Been Hit by Meteor

PASADENA, Calif., Nov. 2 (AP).—The Mariner-9 spacecraft, in the homestretch of a photo mission to Mars, may have been hit by a meteoroid, but there is no indication of serious trouble aboard the spacecraft.

The craft rolled a few degrees at 1600 GMT today for unknown reasons, losing its electronic lock on its guiding star, Canopus, and fixing instead on some other bright star, according to officials at the Jet Propulsion Laboratory here.

They speculated that it was jolted by a tiny space missile, called a micrometeoroid, or perhaps its sensors were distracted by the bright reflection from a piece of space dust.

Radio command signals later returned Mariner-9 to its correct course and it was reported operating normally.

The camera-carrying craft, launched last May, is scheduled to go into orbit around Mars Nov. 13 and return photos from as close as 800 miles, by far the closest views of a planet. When the roll occurred, it was 1.9 million miles from Mars, 65.6 million from earth and 130.4 million from the sun.

UPI.

WELL WISHERS—Mississippi gubernatorial candidate Charles Evers being greeted by black and white hands at his campaign headquarters in Jackson on Monday.

# Vote Turnout Large in U.S. In Governor, Mayor Races

WASHINGTON, Nov. 2 (UPI).—Voters turned out in large numbers today to choose mayors in eight major cities and governors in two states, including Mississippi, where civil rights leader Charles Evers sought election as the first black governor in U.S. history.

These are the first widespread elections in which 18 to 20-year-old Americans could have a significant impact.

Extremely heavy balloting in Cleveland strengthened the likelihood that independent candidate Arnold R. Pinkney, the black president of the city Board of Education, would beat Democratic and Republican opponents and succeed outgoing black Mayor Carl T. Stokes.

Rain in Philadelphia enhanced the chances of former Police Commissioner Frank L. Rizzo, a strong "law and order" candidate, over his Republican challenger, W. Thatcher Longstreth.

The outcome will be watched closely in some areas as foreshadowing voter leanings in the 1972 presidential election year and for the impact—if any—of newly enfranchised young people.

In Mississippi, whites held an overwhelming edge in voter registration for the gubernatorial election, in which Mr. Evers, the independent black mayor of Fayette, faced Democrat William L. Waller, a Jackson lawyer who avoided racial appeals during the campaign.

One of the largest voter turnouts in Kentucky history, nearly one million, was expected in a four-way contest for governor. The major candidates were Republican Thomas K. Emberton and Democratic Lt. Gov. Wendell H. Ford.

In San Francisco, incumbent Mayor Joseph L. Alioto, indicted by a federal grand jury on charges of bribery and conspiracy, is the favorite in a race in which he has nine opponents.

Richard G. Hatcher, the black mayor of Gary, Indiana, is tipped to keep the post.

The mayoral election in Boston pits Democrat incumbent Kevin White against Rep. Louise Day Hicks, also a Democrat. Mrs. Hicks has made political capital during her career by opposing the busing of children to achieve racial balance in schools.

# 3 Russians Said Ousted or Barred By the Belgians

BRUSSELS, Nov. 2 (Reuters).—Two Russian airline officials left for Moscow last week at the Belgian government's request, and a third was barred from returning to Belgium, informed sources said here today.

The moves followed last month's defection to the United States of Soviet trade official Anatoli Tchibotarev, who took with him a list of some 20 Russians allegedly spying in Belgium.

The sources named the airline men as Oleg Gluchenko, 34, and Yuri Parfenov, 40. Both worked for the Soviet company Aeroflot.

The third man was named as Konstantin Leontiev, a manager of a Belgian-Soviet import and export firm. The sources said that he had already left for the Soviet Union and had been asked by the Belgian authorities not to return here.

The Belgian Foreign Ministry declined to comment. Belgian officials stress, however, that the aftermath of the "Tchibotarev affair" is being handled through normal diplomatic channels.

This means that there are no formal expulsions of officials named as spies by the Russian defector. They are discreetly asked to leave or told not to return when they go voluntarily.

## Tass Explains Barring Of Tour by Oistrakh

MOSCOW, Nov. 2 (UPI).—The Soviet news agency, Tass, today confirmed an earlier report that a concert tour of Britain by violinist David Oistrakh was canceled because of poor Soviet-British relations.

Tass said that the state concert organization announced that "it does not consider it possible to send David Oistrakh on a guest tour of Britain this month because of an abnormal situation created by the British authorities for Soviet citizens in Britain." This was an apparent allusion to the expulsion last month of 105 Soviet aides in Britain.

## Pompidou to Niger, Chad

PARIS, Nov. 2 (UPI).—President Georges Pompidou will in January make his second trip to Africa in a year, a government spokesman said today. He will visit Niger and Chad.

# Angela Davis Trial Shifted By Court to San Jose, Calif.

SAN RAFAEL, Calif., Nov. 2 (UPI).—Judge Richard E. Arnason today transferred the Angela Davis murder trial from here to San Jose, 50 miles south of San Francisco.

Judge Arnason ordered a change of venue because there was a "reasonable likelihood that Miss Davis could not receive a fair trial in Marin County."

The judge denied an attempt by the defense to specify San Francisco as the new trial site.

He said that the trial would be switched to San Jose in 10 days.

**Site of Shootout**

Miss Davis is accused of murder, kidnapping and conspiracy in the Aug. 7, 1970, Marin county gun battle that took place at the courthouse where the pretrial proceedings have been held here.

Judge Arnason denied a series of moves by the defense to suppress evidence, including that gathered when Miss Davis's car was stopped July 30 as she was returning from Mexico with Jonathan Jackson, the 17-year-old youth who touched off the bloody incident.

The judge also denied suppression motions in connection with evidence taken when she was arrested in a New York apartment.

Judge Arnason told the defense that it could make further motions to suppress evidence if they were made and heard at least ten days before the trial date, which has not yet been set.

# 2 Poll Watchers Duel; One Killed

GOOSE ROCK, Ky., Nov. 2 (UPI).—Two election officials shot it out in a polling place today, deputy sheriffs said, and one was killed and the other wounded.

Clay County authorities said the gunfight followed an argument when one of the election judges challenged a voter during balloting in Kentucky's gubernatorial election.

Killed was John Mills, 74, a retired schoolteacher, who was working as a Republican election judge. James Smith, 39, a Democratic election judge, was wounded in the left hand and admitted to a hospital. No charges were filed, pending investigation by state police.

## Paris Meeting to Study European Drug Traffic

PARIS, Nov. 2 (UPI).—Representatives of seven European countries will meet Thursday to discuss ways of fighting drug traffic, government officials said today. The meeting will be the first step to European cooperation on anti-drug measures proposed by French President Georges Pompidou in August.

Thirty-five representatives from Great Britain, France, Italy, West Germany, Belgium, Holland and Luxembourg will attend.

## 102 U.S. Police Slain in 10 Mos.

WASHINGTON, Nov. 2 (UPI).—One hundred and two policemen were killed in the first ten months of this year, 11 of them in October, according to the FBI.

Ninety-six percent of the slayings, the FBI said, were with firearms, largely handguns. In the first ten months of last year, 85 policemen were slain.

# Tito Calls UN Best Way to World Peace

## In Los Angeles, He Also Stresses Aid

LOS ANGELES, Nov. 2 (UPI).—President Tito of Yugoslavia, in his only major speech in the United States, urged America yesterday to consider the United Nations as the best vehicle for world peace and to help countries existing in a "sea of poverty and want."

His remarks came at a time when Congress is considering reduction of its foreign aid program and, because of the expulsion of Nationalist China, is being urged to cut its contribution of funds for UN expenses.

Marshal Tito, 79, was to go to Canada today for a five-day visit—thus becoming the second major Communist leader to visit that country recently. Soviet Premier Alexei N. Kosygin visited Canada last week.

Security was expected to be as tight for Marshal Tito as it was for Mr. Kosygin, who was attacked in Ottawa and was the target of demonstrations during his entire stay in Canada.

**Talks With Nixon**

President Tito has spent the last week meeting with President Nixon and touring the United States.

In an address to more than 2,000 persons at a luncheon of the World Affairs Council here yesterday, Marshal Tito read only the first few sentences in his native language. The remainder was read in English by an interpreter.

"We think the United Nations is the factor of peace to which we should all devote the greatest attention," he said.

"Although the United Nations has not always been able to find solutions for problems plaguing the world, mankind continues to place its hopes in this most distinguished world forum and instrument of democratic and equal international cooperation."

# UN Aid Plan Gets Pledges Of 119 Countries—But Not U.S.

UNITED NATIONS, N.Y., Nov. 2 (AP).—The United Nations Development Program announced, at the end of a daylong pledging conference yesterday, that it expects to have at least $265 million for its 1972 projects—an increase of $25 million over the current year.

The United States did not pledge, but the figure announced included an anticipated U.S. contribution of $86 million, the amount given for the current year.

Ambassador Bernard Zagorin, the American delegate to the conference, said, "Because the U.S. Congress has not completed consideration of U.S. volunteer contributions to international development agencies, I am unable to announce a pledge at this time."

The Senate voted last week to kill the Nixon administration's foreign-aid authorization bill, which specified voluntary contributions of $141 million to 11 UN undertakings.

Paul Hoffman, the retiring head of the UNDP, said total pledges could go to $275 million or higher, depending on the contributions of the United States and Japan, which also failed to announce a pledge.

UN spokesmen said 119 countries pledged a total of $172.7 million yesterday. That compares with $146 million pledged at last year's conference, when the United States and Japan also did not announce pledges.

Sweden pledged the largest sum of any nation yesterday—$26 million. The largest increase was announced by the United Kingdom, whose pledge of $19 million was an increase of 33 percent over the current year.

In all, 63 countries increased their pledges from last year.

**Set Up in 1959**

The UNDP, created in 1959, is the UN's main agency for agricultural and industrial aid to developing nations. Secretary-General U Thant, at yesterday's pledging conference, said the UNDP hopes to increase contributions so that it will have $500 million in voluntary contributions by 1976.

That would represent a billion dollars in development programs, because the countries receiving aid agree to pay more than half the costs of UNDP-assisted projects.

Other major contributors yesterday included Denmark, $20 million; West Germany, $14 million; the Netherlands, $13 million, and France, $5.6 million.

**Senators Ask UN Reform**

WASHINGTON, Nov. 2 (Reuters).—A bipartisan group of 63 senators yesterday backed a resolution urging the United States to take the initiative in calling an international conference to consider reforming the United Nations.

The coalition, which includes senators who last week urged a reduction in U.S. contributions to the world organization, is seeking fundamental changes in the UN Charter, including representation and voting in the General Assembly, UN financing and the role of the World Court.

Sen. Allen Cranston, D., Calif., who is the chief sponsor of the resolution, told a press conference that over 70 senators have expressed a strong wish for changes to strengthen the United Nations.

**No Accord**

He added, however, that there is no agreement on the changes that should be made.

A major proposal by Sen. Cranston calls for weighted voting in the UN, giving countries with the biggest populations the greatest say.

"It (the United Nations) must get away from the one vote per nation," Sen. Cranston said.

# GAO Says 130,000 In U.S. Military May Be Alcoholics

WASHINGTON, Nov. 2 (AP).—Congressional investigators say that there are an estimated 130,000 alcoholics in the U.S. armed forces and that the Pentagon has done little to treat them, preferring punishment instead.

A report today by the General Accounting Office said that the Defense Department could save thousands of careers and at least $120 million a year by treating and rehabilitating alcoholics as it now does drug users.

The GAO recommended a comprehensive alcoholism-control program. The GAO said that it found hospital commanders who "believed that chronic alcoholism and problem drinking represented moral and spiritual deficiency."

The GAO study was made at the request of the Senate subcommittee on alcoholism and narcotics headed by Sen. Harold E. Hughes, D., Iowa.

# U.S. Pay Freeze Not Applied To Foreign Workers Abroad

By Mike Causey

WASHINGTON, Nov. 2 (WP).—The white-collar pay freeze through next July 1 is strictly a domestic operation.

Rather than risk the ill will of our allies, Uncle Sam has quietly continued to give local pay raises and cost-of-living adjustments to the 142,000 foreign nationals who serve this government abroad.

The result has been that Americans employed in U.S. defense and Foreign Service posts overseas have had longevity pay increases withheld while processing and authorizing pay boosts for non-Americans they supervise.

Most of the Germans, Vietnamese, Japanese, Koreans and Italians working for Uncle Sam make less than $3,500 a year. Their salaries are generally pegged to the local economy (at the request of their own governments). But their governments do insist, and the United States usually agrees, that they be granted local holidays and wage boosts when they come due.

**Purely American**

When the wage-price freeze was first announced Aug. 15, federal officials gave serious consideration to extending it to the 142,000 non-American employees. But they were told that, balance of payments notwithstanding, it would be more trouble than it was worth to withhold wage increases due. For that reason, the U.S. government decided that the freeze would be purely an American sacrifice.

Foreigners working for the U.S. government in this country, however, have had wages frozen like those of their American counterparts.

In-grade pay raises, which have been frozen since mid-August, will be payable when Phase 1 of the freeze is lifted sometime this month. But none of those payments will be retroactive. Employees who become eligible for them Aug. 15 will get paid only for that day. The nearly three months in between will, in effect, be money lost.

An estimated 162,000 employees are qualifying for the longevity boosts during the Aug. 15-Nov. 13 period.

**Few Earn Over $13,000**

Fewer than 100 foreign nationals working overseas for the United States earn more than $13,000 a year, and only a dozen get more than $18,500. But whatever their salary, they have received increases due them.

A pay raise of around 6 percent had been scheduled for the 1.3 million government employees here and overseas on Jan. 1. That rise has been delayed until next July, although in-grade increases will be restarted sometime this month.

Meanwhile, union officials have little hope that Congress will approve a bill by Sen. Hiram Fong, R., Hawaii, that would permit some sort of government pay rise in February. Sen. Fong introduced the bill after getting lots of unkind comments from his constituents when he voted to defer government raises to next July. His bill would permit government increases equal to whatever percentage is granted private employees under the Phase 2 guidelines.

Meanwhile the administration order to trim the average federal pay grade is causing major confusion in agencies debating how to accomplish it.

In August, Mr. Nixon said grade creep, or escalation, had become a serious problem. His directive, transmitted through the Office of Management and Budget, requires that it be stopped, and reversed over the next two years.

Agencies have been given a complicated set of formulas to determine what sort of cuts they must make. In agencies where the average grade had jumped dramatically since 1969, the cutbacks are sharpest. The government estimates that the "average" employee now makes around $9,400 a year in the median GS 8.1 grade.

## Mintoff to Bucharest

ROME, Nov. 2 (Reuters).—Maltese Prime Minister Dom Mintoff left here for Bucharest today for an official visit to Romania. Mr. Mintoff, who arrived yesterday for a one-day stopover in Rome, is expected to visit Britain and West Germany later.

# Workers Go Back to Jobs In Barcelona

## Auto Plant Reopens Despite Man's Death

BARCELONA, Nov. 2 (Reuters).—Workers returned to their jobs at the Seat car factory here today in spite of the reported death of a colleague last night, which had been expected to prolong labor unrest here.

For the first time in almost two weeks, Seat assembly lines were rolling, according to an announcement from the management. It said the entire morning shift turned up, and full normality had returned to the strike-plagued plan.

It was the morning shift that first walked out on Oct. 18 to demand reinstatement of 25 men fired last June for taking part in an earlier strike.

The walkout led to clashes with police, during which a worker, Antonio Ruiz Villalba, was shot. Last night he was reported to have died of his wound.

After subsequent stoppages by the Seat morning shift and sympathy strikes by the afternoon and evening crews, about 10,000 of the factory's 18,000 assembly-line workers were suspended without pay.

The suspensions ended yesterday, but labor sources had predicted last night that because of Mr. Ruiz's death it was unlikely that any of the men would return today to the factory, where vehicles are manufactured under license from the Fiat company of Italy.

The Seat strike has been accompanied by sporadic sympathy stoppages throughout the city.

A walkout by drivers and conductors which last week brought Barcelona's bus system to a halt apparently ended today when most of the men reported for work.

# 15 Army Rockets Stolen in Hanau

HANAU, West Germany, Nov. 2 (UPI).—The U.S. Army today reported 15 anti-tank rockets missing from a barracks in this Frankfurt suburb. They were presumed to have been stolen.

A Third Armored Division communiqué said the rockets were found to be missing Friday from the ammunition storage bunker at Fliegerhorst Barracks. It described them as M-72 anti-tank weapons, designed to be fired from small hand-held rocket launchers.

Military police and German criminal police were cooperating in the hunt for the rockets, the communiqué said.

# GI Drives Truck To East Germany

BAYREUTH, West Germany, Nov. 2 (UPI).—An American soldier drove an Army truck across the border into East Germany Friday and vanished, an Army spokesman said today.

The spokesman identified the soldier as Spec. 4 David Fields, 25, of Madison, Wis., stationed at Bayreuth with the 2d Armored Cavalry Regiment. Armored cars and jeeps of the regiment regularly patrol the nearby East German frontier.

Spec. 4 Fields drove a 1969 Dodge truck across a guarded road crossing at Ruedelstein, near Hof, 36 miles northeast of Bayreuth, the spokesman said.

So far there has been no indication whether the soldier requested asylum from the East German Communists. The East Germans have kept silent on the incident, and the vehicle has not been returned.

# New Directions in Foreign Aid

It is evident from reports emanating from Monday's closed-door meeting of the Foreign Relations Committee that members are having second thoughts on the Senate's rash vote to kill the foreign aid authorization bill. But it is equally apparent that there is nothing approaching agreement on the new directions foreign aid must take in order to muster adequate support in the Congress.

Sen. Fulbright and others are talking in terms of stop-gap legislation that would emphasize humanitarian programs—particularly those administered by international institutions—and greatly reduce the military component of aid, which accounts for more than half of the administration's foreign assistance package. There is merit in this approach, but it is doubtful whether a bill tailored to Mr. Fulbright's exacting requirements could command a majority at this time, especially in view of the support the administration was able to rally behind its military proposals before Friday's final negative vote.

It would be equally unrealistic for the administration to try now to ram the foreign aid bill through the Senate in anything like its present form. Although it was not the only factor by any means, an important component of the administration's defeat on the aid bill was congressional and national disillusionment with presidential policies involving heavy military support for authoritarian governments, particularly in Southeast Asia. Unless there is some revision of these policies, and of the aid requests that are designed to support them, there is little hope for rebuilding a congressional consensus in support of a broad foreign assistance program, even with the sweeping reorganization proposed last year by the Peterson Commission.

A period of hard bargaining is ahead in which both the President and his congressional critics will have to make concessions. In the meantime, to prevent a national disgrace from turning into an international disaster, it is essential that Congress act promptly to keep the foreign aid machinery intact through another continuing resolution, extending the aid program at current levels beyond the Nov. 15 expiration date. In view of the depth of current disagreements, such an extension should allow at least 90 days for tempers to cool and for thoughtful reappraisal.

There is also need for prompt action to provide supplemental funds, as already requested by the administration, to help care for the nine million or more Pakistani refugees. There surely can be no quarrel over this urgent humanitarian need.

In reconsidering foreign aid, it would be helpful if both Congress and the administration disabused themselves of a myth that has been irresponsibly fostered lately by both the President and some of AID's congressional critics—the notion that the United States is bearing more than its share of the international development burden rightly assumed by the "have" nations for sharing with the "have nots."

Although the United States is still the largest contributor in absolute terms to overseas development programs, the U.S. contribution measured in terms of ability to pay—aid as a percentage of Gross National Product—ranks 12th among the 16 aid-donor nations. There is no place for pride or self-pity in this performance.

THE NEW YORK TIMES.

# Mrs. Gandhi's Visit

Mrs. Gandhi's arrival gives President Nixon the chance to get Indian-American relations out of the tailspin they've been in since the United States began condoning, if not quite endorsing, Pakistan's expulsion of some nine million refugees into India—a movement of people and misery, by the way, which has made war talk in the subcontinent ring louder than it has for years. That Indian-American relations are in a tailspin is apparent. The governments are all but openly snapping at each other and, at least on the Indian side, popular support for continuing a previously deep and friendly association has diminished sharply. This can only disturb those who believe that a good relationship between the world's strongest democracy and the largest is essential to the interests of them both.

There are perhaps three things that Mr. Nixon might consider. The first is to assure Prime Minister Gandhi that the direct supply of American arms to Pakistan will halt. The amount of arms affected would be trivial; whatever supplies might still be deemed necessary could be routed through third countries. But a halt would remove the most conspicuous and, in India, the most maddening symbol of American favor for Pakistan.

Secondly, Mrs. Gandhi deserves American assurance that the Aid India Consortium will treat India's refugee load not merely as a costly relief burden in itself but as a heavy drag on the country's whole economic development. Pakistan declared a moratorium on its debts; the United States acquiesced. Does fairness not argue that India should be "rewarded" for continuing to pay its debts on schedule?

Finally, Mr. Nixon has got to do some sympathetic listening. His own aides seem to have informed him that the humanitarian crisis on the subcontinent arises essentially from the general condition of poverty and from last year's cyclone, and that the political crisis is owed to India's aid and encouragement to the Bengali insurgents. Mrs. Gandhi will be able to offer a perspective closer to reality—namely, that the humanitarian and political disasters alike are chiefly of the Pakistan government's own making and that their resolution will require the kind of changes in Pakistani policy which only American urging can help bring about.

THE WASHINGTON POST.

## International Opinion

### *Nixon's Peking Visit*

The declarations of Mr. Nixon's adviser indicate that preparations for the presidential visit to China are more difficult than expected. Mr. Nixon was generally expected to go to Peking before the end of the year. Before leaving for the Chinese capital, Mr. Kissinger had moreover asserted that the date of the Nixon visit would be announced "shortly after" his return. He has also shown caution on the results to be expected from the visit. The Peking talks, he said, will probably not solve "most of the problems" between the two countries. According to Mr. Kissinger, the conversations will deal only with bilateral problems. The Sino-Soviet conflict and the war in Vietnam will not be discussed.

*—From Le Monde (Paris).*

### *American Aid*

The argument that aid is necessary to American foreign policy conflicts with the growing American conviction that those who said one could not buy friendships were right. The problem is not so simple. Much American aid has produced, not bought, invaluable good will and stability because it has done demonstrable economic and social good—though nearly always in countries which had governments and social structures (like the beneficiaries of the Marshall Plan) capable of using it, and so already well disposed to Western liberalism.

Of the 16 main donor countries, the United States now ranks 12th in scale of giving. Development aid in 1949 was nearly 3 percent of the American Gross National Product—now it is one-third of 1 percent, according to Mr. McNamara. It can hardly be allowed to fall to nil. But the Senate's warning had better be taken seriously in the wider context.

*—From the Times (London).*

### *Britain and Europe*

The solid House of Commons majority for British membership in the Common Market is more than just testimony to the brilliant tactics and dogged policy with which Prime Minister Heath brought about this decision against unfavorable circumstances. It is more than just a reaction to the miscalculated opportunism of the Socialist opposition, which will cost its leader Wilson and other Labor politicians considerable loss of prestige and authority.

Behind Britain's "turning to Europe" is an unequivocal political will. England wishes to form its future within the European context—that is, it wishes to have a hand in forming Europe. For centuries it was a guideline of London's policy to prevent the domination of any single superior power on the Continent. This maxim has lost none of its timeliness despite the fact that one of its motives, the empire of a maritime power, is no more and that England is now binding itself to Europe instead of remaining apart from it. Europe needs this policy and this guideline.

*—From the Neue Zuercher Zeitung (Zurich).*

## In the International Edition

### Seventy-Five Years Ago

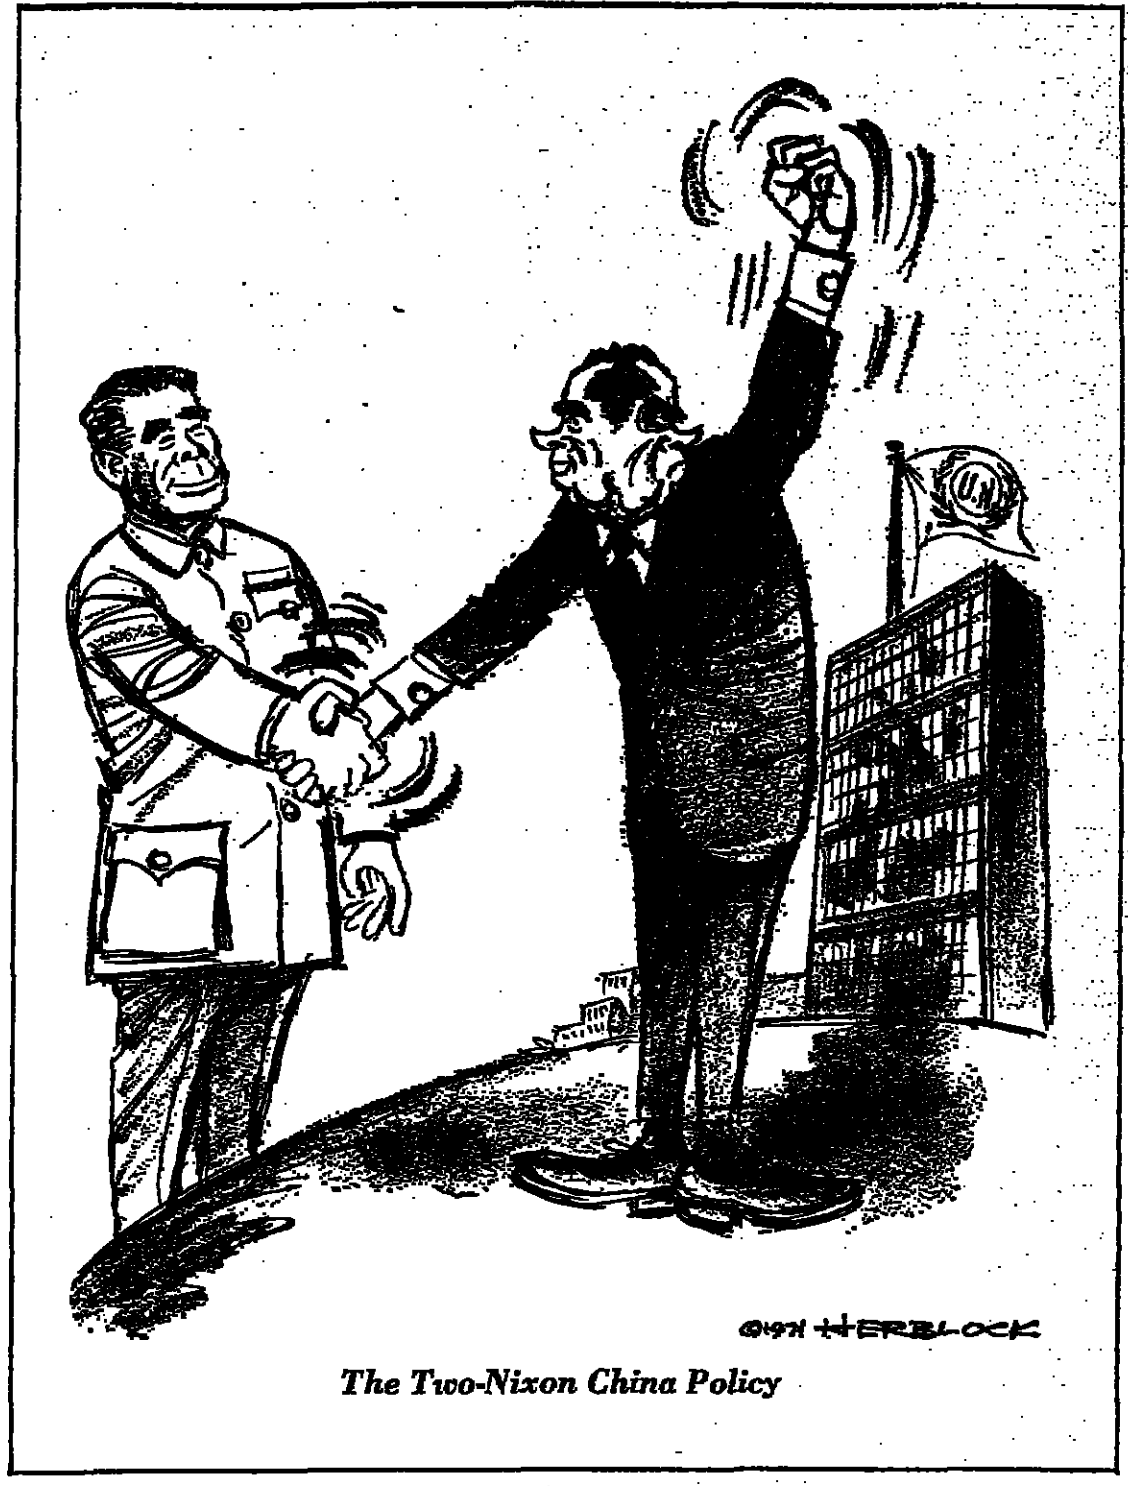
November 3, 1896

PARIS—In the 45 States of the American Union the people today will quietly go to the polls and decide by their ballots whether Mr. McKinley or Mr. Bryan is to be President of the United States for the next four years beginning March 4 next. Exciting as the campaign has been and momentous as are the issues involved, it all comes down to, we hope, the common sense victory of William McKinley.

### Fifty Years Ago

November 3, 1921

LONDON—Regarding the Irish Peace Conference, despite the admitted toughness of the present situation, despite the even tougher character of the Ulster prejudice against the South of Ireland, political opinion here tonight is that Mr. Lloyd George will get away with it once more, and get his compromise from both sides. It is to be hoped that within a few days, Ulster leaders will see the light.



*The Two-Nixon China Policy*

# Two Men in the Same Boat

### By C. L. Sulzberger

PARIS—Many signs indicate that the political power and diplomatic policy of Prime Minister Chou En-lai are on the rise in China and that the forthcoming visit of President Nixon is directly linked to this.

Chou does seem to be running the People's Republic, but his position has not been firmly established. Therefore, the prospect of new U.S. relations, underlined by the Nixon trip, is a matter of signal importance to the prime minister's personal standing.

China-watching is an arcane and uncertain metier. Nevertheless, China-watchers, although they may disagree in their conclusions, start their analyses of the current situation with the strange events of Sept. 12-13: These touched off separate but contemporaneous chains of military and political events that almost certainly have not finished.

### *The Jet Crash*

On that date, probably at night, a British-made Trident jet of the Chinese civilian airline crashed deep inside the Outer Mongolian People's Republic, apparently due to an accident, not an attack.

It was not a regular scheduled flight and, although a Trident can hold well over 100 passengers plus crew, only nine bodies were found in the wreckage. They were reportedly those of rather young people, including one woman. Mongolia protested the violation of its air space and Peking apologized through its embassy there.

Since China has few Tridents it is apparent the persons aboard must have had considerable influence to gain access to the aircraft. One theory is that they commandeered the plane in order to escape after an unsuccessful conspiracy. There had been reports of internal fighting in China prior to and coincidental with that time, and the three armed-services chiefs of staff have since disappeared from public view or mention in their country. The Communist party had been trying to re-establish its authority following the Cultural Revolution, during which Mao Tse-tung used the army to curb it.

### *Parade Canceled*

Although the news leaked only tardily, right after the crash Peking canceled its annual October parade and displays, including pictures of Mao, were taken down. Notably fewer of his famous quotations were cited in the press and recently the public cult of Maoism has clearly been waning.

Mao, appearing very feeble, has been seen only once since mid-September—at the time of Emperor Haile Selassie's visit. When a Chinese delegation came to France last month, not a single member wore his customary Mao button or even once mentioned the Communist chief's name.

Meanwhile, an awaited People's National Assembly was not convened. Lin Piao, army commander and Mao's designated successor, has been kept from the public eye. A few days ago his picture appeared for the first time since the crash—in a magazine circulated abroad but not inside China. The army chief of staff, Gen. Huang Yung-sheng, was publicized in the same issue.

There has been rivalry between so-called leftist groups and others ever since Mao confided as much to a visitor in December, 1970. The leftists seem to have been losing power positions.

Nevertheless, Peking's agreement to receive Nixon may have revived old quarrels. There is speculation that the far left complains that China risks giving the appearance of ending its battle against materialism, abandoning its revolutionary line and cooling off on Vietnam.

Since Chou is involved in the Nixon visit far more than any other Chinese, his reputation is at stake. He must prove China will gain from the affair. He was pleased to be able to demonstrate that, since announcement of the President's trip, China has been admitted to the UN. After the vote was announced, the smiling prime minister appeared at an Iranian Embassy reception and toasted everyone in sight.

But there is no conclusive evidence that the struggle everyone suspects to be taking place can yet be considered over. Kang Sheng, chief of the Communist party security apparatus, was also mentioned with Lin and Huang in the magazine for foreign consumption only. The fact that it isn't distributed in China merely adds to the confusion.

About all we know is that Chou seems to be running the show, in the shadow of a faltering Mao, and that he appears to depend on a successful colloquy with Nixon as much as Nixon's own political future relies on a deal with Chou.

# *The High Road to the Great Wall*

### By Robert Kleiman

NEW YORK.—When Henry Kissinger and his 13 aides drove into Peking airport Oct. 26 to board their presidential Boeing-707 for Washington, they noticed something missing: the huge billboard that had faced them on arrival six days before. Gone were the 40-foot-high Chinese characters, each mounted on a wooden framework, that proclaimed: "Oppose U.S. Imperialism and All Its Running Dogs!"

Earlier, they found that Peking's diplomatic store, the Anti-Imperialist Shop, had been renamed the Friendship Shop since Mr. Kissinger's visit in July. The Anti-Imperialist Hospital was now the Friendship Hospital and the same change reportedly had been made elsewhere.

None of this, of course, means that friendship has replaced official antagonism, nor that the anti-American slogans that blanket China are all coming down. Nevertheless, symbolic gestures can play a valuable role in the new Chinese-American relationship.

The chief danger at the moment, as Japan warned the United Nations last month, is that the expulsion of Taiwan at Peking's demand could interrupt an "orderly process of evolution" and bring "an abrupt change in the delicate international situation prevailing in the Far East."

### *Larger Issue*

For evolution toward a negotiated settlement between Taipei and Peking, rather than reunion by force, lies at the very origin of the China-United States effort to wind down a 21-year confrontation. It is an effort for peace that dwarfs UN membership issues.

The origin of that effort lies in a little-known episode in the fall of 1969. A China desk officer in the State Department learned that the Pentagon for budget reasons was planning to discontinue regular naval patrolling of the Taiwan Strait—a practice begun when President Truman interposed the Seventh Fleet in 1950 during the Korean war.

Suspension of the Taiwan Strait patrol had long been one of the major "signals" suggested by China analysts, along with trade and travel liberalization, to entice Peking into a serious dialogue. Peking's main conditions for improvement of relations were termination of United States "occupation" of Taiwan and the Strait.

But the Pentagon and the White House hesitated, although the defense of Taiwan depended on the U.S. security treaty and the carriers and cruisers of the Seventh Flet, not on the two destroyers in the Taiwan Strait or the few thousand American logistical troops on the island.

Moreover, while Communist China had always refused to renounce the use of force to regain Taiwan—Washington's precondition for recognition—it had never acquired enough sea or airlift for an invasion. It hinted instead that the issue could be resolved by peaceful means once Generalissimo Chiang Kai-shek, now 84, was gone.

In these circumstances, Secretary of State Rogers on Nov. 7, 1969, secretly cabled the American Embassies in Tokyo, Seoul and Taipei to notify those governments that the regular Taiwan Strait patrol would be discontinued for budget reasons on Nov. 15. Taipei complained bitterly in private.

But within days after the unannounced suspension of the destroyer patrol, Peking's representatives in Hong Kong were asking whether the move had any significance. They were assured that it had.

### *A Key Moment*

It was a propitious moment for the Nixon administration's year-long effort to open talks with China. Peking wanted a counterbalance for its impending border negotiations with Moscow, arranged after repeated frontier clashes and an indirect Soviet threat of a pre-emptive nuclear strike.

By Dec. 11, procedural Chinese-American discussions were under way in Warsaw, followed by formal ambassadorial talks on Jan. 20 and Feb. 20, 1970, the first in two years. A precedent was set by meeting alternately in the two embassies, instead of a Polish palace, where Soviet "bugs" were suspected.

Presumably to worry the Russians futher, Peking's representative made a point of driving up to the American Embassy in a large, black limousine with flags flying.

It was that series of meetings, suspended temporarily by the Chinese after American forces invaded Cambodia, that led to the higher-level Kissinger talks with Premier Chou En-lai and the projected Nixon visit to Peking.

This hopeful evolution thus stemmed substantially from withdrawal of the Taiwan Strait patrol. That symbolic gesture hinted that the Taiwan issue was for Peking and Taipei to settle—and acknowledged that Peking did not threaten Taiwan with immediate military seizure.

In response, China put aside its long-held position that nothing could be negotiated until Washington agreed to evacuate Taiwan and permit its reunion with the mainland. Peking agreed to discuss a wide range of Asian issues with President Nixon without preconditions—in effect giving Taiwan a lower priority. The American hope is that during Mr. Nixon's Peking visit a mechanism can be set up for the long continuing dialogue that is essential if other major differences are to be resolved.

But there is a risk now, with Taiwan expelled from the UN, that some in Peking may be tempted to press that advantage home by a return to the intransigent tactics of the past.

## At Princeton Conference

# *The FBI Revalue*

### By Joseph Kraft

PRINCETON, N.J.—Anybody interested in the cooling national temperature should examine the conference on the FBI which took place here in Princeton last weekend. For what shaped up as an exercise in "radical-chic" attack turned out to have a story line a good deal less predictable than expected.

In the course of the conference the achievements of the bureau were abundantly highlighted, and sympathetic attention was directed to its future problems. One thing that finally emerged was a sense that running the bureau well would be harder than ever once J. Edgar Hoover finally stepped down.

At the outset, to be sure, there was plenty of uncritical anti-Hooverism at work. The Committee for Public Justice, which sponsored the conference along with the Department of Politics at Princeton University, had put together a speakers' list dominated by professional haters of the FBI. And in the opening sessions they did their stuff.

I. F. Stone delivered a paper detailing what he asserted was the bureau's role as a political police system, beginning with the Palmer raids back in 1919 and 1920. Frank Donner of the American Civil Liberties Union and Prof. Thomas Emerson of the Yale Law School set out in abundant detail a record of violations by the bureau of the basic liberties guaranteed in the Bill of Rights.

An overheated account of J. Edgar Hoover as publicity-seeker was delivered by Robert Sherrill of The Nation magazine. And many of the charges were backed up by a group of former agents and informers for the FBI who had been assembled for the occasion.

But Prof. Duane Lockhard of the Princeton faculty took sharp exception to putting J. Edgar Hoover on trial. And a series of participants, many with practical experience in law enforcement, directed the conference to concrete cases.

Burke Marshall and John Doar—two former assistant attorneys general under John Kennedy and Lyndon Johnson—addressed the problem of the bureau and civil rights. Marshall argued that the bureau had moved into the field no slower than the rest of the United States government. Doar, in a detailed paper p

## il I. Romm, Film Man, sed Khrushchev Code

ov. 2 (AP).—The etskaya Kultura y the death yesail I. Romm, 70, director in the or more than 30 shed with Nikita en premier, over

first worked in twriter. The first film he directed was "Dumpling," in 1934.

His film "Thirteen," in 1937, about the establishment of Soviet power in central Asia, was hailed by the Communist party. During the 1930s and 1940s he produced a number of propaganda films. He received an Order of Lenin and five Stalin Prizes for them.

In 1945 he won a prize at the international film festival in France. His film "Vladimir Ilyich Lenin" was released in 1949 for the 25th anniversary of the death of Lenin.

After the death of Stalin, Mr. Romm publicly disavowed what he called his "shortcomings of the past."

In 1962, when Khrushchev launched his attack on modern art, Mr. Romm was one of the members of the artistic and scientific community who wrote to the premier asking him to "stop the swing in the representational arts to past methods which are alien to the whole spirit of our times."

Discussing arts at the party's Central Committee session in 1963, Khrushchev singled out Mr. Romm for his "incorrect views about the role of film."

Mr. Romm's last film, in 1965, was a documentary on Nazi atrocities and was called "Ordinary Fascism."

Alonzo G. Moron

SAN JUAN, Puerto Rico, Nov. 2 (AP).—Alonzo G. Moron, 62, former Hampton Institute president and former deputy regional director in Puerto Rico for the U.S. Department of Housing and Urban Development, died here Sunday after a long illness.

Mr. Moron was president of Hampton Institute in Virginia from 1948 to 1960 and was a former commissioner of education and of welfare in the Virgin Islands. He was born in St. Thomas and was a graduate of Harvard Law School.

Mr. Moron had been in charge of housing programs in Puerto Rico from the time he left Hampton Institute until he became ill.

Prof. Raymond de Saussures

GENEVA, Nov. 2 (AP).—The death was announced here today of Swiss psychiatrist Prof. Raymond de Saussures, 77, former associate at the Psychoanalytical Clinic of Columbia University, New York.

A former instructor at the Paris Psychoanalytical Institute, he became president of both the Swiss and European Societies for Psychoanalysis. Prof. de Saussures published several books, among them "The Greek Miracle" and "Psychoanalysis and History."

GROUNDED—BEA planes lined up at Heathrow on 2d day of ground workers' strike.

### Thousands of Passengers Again Stranded

## *Heathrow Airport Still Tied Up by Strike*

LONDON, Nov. 2 (UPI).—A labor dispute brought operations at London's Heathrow Airport to a virtual halt today, forcing the cancellation of dozens of flights and stranding thousands of passengers.

London's high court slapped an injunction until Friday on six leaders of the dispute, prohibiting them from picketing.

Three American airlines—Pan American, Trans World and National—avoided some of the chaos, partially caused by fuel truck drivers refusing to cross a picket line, by flying to Shannon, Ireland, to refuel.

Airport officials said fog at Heathrow added to flight confusion and that all morning incoming flights, including one returning Princess Anne from an official visit to Hong Kong, were diverted to other airports.

The dispute began yesterday when a Canadian-owned company—General Aviation Services—began servicing Iberia, Spain's national airline. KLM, the Royal Dutch Airline, formerly did the work.

About 3,000 British European Airways workers voted yesterday to stop work until the British airport authority suspended the new General Aviation Services contract. They said the arrangement would result in a loss of jobs.

Today BEA ordered them back to work or be fired for breach of contract.

In another development, a man with an Irish accent telephoned the airport to say a bomb had been placed in the control tower. All 200 persons in the tower evacuated it for an hour.

But no bomb was found and the effect on air traffic was said to be minimal since few planes were flying. Four aircraft landed or took off during the period under guidance from an emergency radio truck on the field.

## *UN Unit Hits S. Africa for Jailing Dean*

UNITED NATIONS, N.Y., Nov. 2 (Reuters).—The General Assembly's Special Committee on Apartheid last night denounced the five-year jail sentence passed on the Anglican dean of Johannesburg and called for an international judicial inquiry into "ill-treatment and torture of prisoners by the South African regime."

The committee said the conviction of the dean, the Very Rev. Gonville ffrench-Beytagh, under the Suppression of Communism Act shows the extent to which South Africa will go "to stifle all opposition to its racist policies."

The committee paid tribute to Dean ffrench-Beytagh and called on all governments and on world public opinion to denounce his conviction.

The committee's statement expressed anxiety over continuing reports of ill-treatment and torture of political prisoners and detainees in South Africa.

It said Ahmad Timol died "under the most suspicious circumstances during interrogation under police custody on Oct. 27."

Mr. Timol fell from the 10th floor of the Security Police headquarters in Johannesburg. Police said it was suicide.

Won't Come Out Alive

JOHANNESBURG, Nov. 2 (AP).—"I won't come out alive, you know," said Dean ffrench-Beytagh today, commenting on his sentence to five years' imprisonment.

Friends of the 59-year-old cleric, who suffers from a heart complaint, said he was "extremely angry" at the verdict of the Supreme Court yesterday.

They added that the dean hoped to take a vacation and travel around the country, pending appeal, to say farewell to his friends.

Another Cleric in Court

PRETORIA, Nov. 2 (Reuters).—A Presbyterian minister, the Rev. Ian Thompson, who shouted that he too was guilty when the Anglican dean of Johannesburg was sentenced to five years' imprisonment yesterday, appeared in court today charged with contempt of court.

After a brief hearing the case was postponed to Nov. 16, and the minister was released on his own recognizance.

## Rippon, in Bonn, Says U.S. Stirs Recession Fears

BONN, Nov. 2 (AP).—Geoffrey Rippon, Britain's minister for European affairs, said today that recent U.S. economic moves have triggered fears of a recession which would threaten the welfare of the whole world.

He said Europeans must ultimately take on a greater share of the Western defense burden while, at the same time, "We cannot hope, nor do we wish in any sense, to replace the American military presence in Europe."

Mr. Rippon made the remarks in a prepared lecture to the German Society for Foreign Policy. It was his first public speech in Europe since the House of Commons approved Britain's entry into the Common Market.

"The U.S. monetary matters have given rise to fears that we are entering in an era of protectionism between blocs which will lead to world economic recession," Mr. Rippon said. "This is a real danger and one which would threaten the welfare of the whole world."

He said he hoped the enlarged European community will be "a zone of stability and responsibility in international affairs and an industrial unit of the first magnitude."

## Italy's Nenni in China

TOKYO, Nov. 2 (AP).—Italy's former Vice-Premier and Foreign Minister Pietro Nenni and a traveling party arrived in Shanghai by air today for a visit to China at the invitation of the Peking government, the New China News Agency said.

*Attacking IATA as 'Malignant Cartel'*

## Nader Unit Sues CAB Over Air-Fares Fixing

By Christopher D. Lydon

WASHINGTON, Nov. 2 (NYT).—The fare-setting association of international airlines — already beset by internal disputes about transatlantic discounts and by the competition of cheap charter flights—was challenged anew by a lawsuit here today.

The Aviation Consumer Action Project—organized last spring by Ralph Nader—directed its suit against the Civil Aeronautics Board. But the real target of the action was the International Air Transport Association, known as IATA, whose secretly negotiated rate structures have almost invariably been approved by the CAB for the last 25 years.

The 70-page complaint described IATA as "an economically malignant cartel" that has fixed prices at unreasonably high levels, stultifying competition and the natural growth of tourism largely for the benefit of inefficient foreign carriers.

Possibly Unconstitutional

*The suit argued it is illegal* and possibly unconstitutional for the CAB to approve IATA's rate agreements and to let U.S. airlines participate in them.

The secret negotiation of fares violates anti-trust principles and the open-hearing requirements of administrative procedure, the ACAP charged. And to the extent that high fares restrict the traveling public's movements, it said, IATA fares also violate a constitutional "right to travel."

The suit said that the American government should enter bilateral negotiations on the fares for individual routes. Among the results, ACAP predicted, would be a strong consumer voice in international rate-making and fare reductions of up to 50 percent.

R. Tenney Johnson, the CAB's general counsel, said he was "befuddled" by *the suit. The courts* have left little doubt, he insisted, about the board's authority to review IATA rate agreements. But even if ACAP won its case and the CAB were forced to disapprove the IATA machinery, Mr. Johnson argued, the court's decision would have no practical effect on air fares.

With or without the participation of U.S. carriers, he said, IATA could agree upon a single transatlantic fare, for example, and expect the American competitors on the route—Pan American World Airways and Trans World Airlines—to meet it.

If Pan Am and TWA sought to undercut it, Mr. Johnson continued, IATA members in Europe could threaten withdrawal of landing rights for the American lines.

But, Mr. Nader said in an interview today, the CAB's complete abandonment would open the way for a public investigation of international air rates, which, in turn, would invite congressional participation and add to the pressures for price-cutting reforms.

## *Auto Collision At Elysée Palace*

PARIS, Nov. 2 (AFP).—Two automobiles used by French cabinet ministers collided in the courtyard of the Elysée Palace today as a special cabinet meeting came to a close about 6:45 p.m. No one was injured.

One of the cars was that of Jacques Duhamel, minister of cultural affairs, who was not in the auto. Neither was the other minister, who was not identified, in his auto. Damage to the cars *was minimal.*

They collided as the drivers prepared to leave the closely ranged parking ranks to approach the doorway to pick up the ministers as they *left the meeting.*

### French Jet Pilot Killed

TOULON, France, Nov. 2 (Reuters).—A French Navy Crusader jet blew up shortly after takeoff near here today, killing its pilot. The cause of the accident was not immediately known.

### *Hardin in Turkey To Discuss Opium Ban*

ANKARA, Nov. 2 (AP).—U.S. Agriculture Secretary Clifford Hardin arrived here today to discuss with Turkish leaders U.S. aid to develop crops to replace the opium poppy.

Turkey's government, under pressure from the United States and the United Nations, decided on June 30 to ban opium production, a traditional crop in western Turkey, after 1972.

**Foreign exchange has been a businessman's headache long enough!**

Let's not kid ourselves.

When dealing with so many foreign exchange regulations and problems, no bank can wave a magic wand and make all your headaches vanish.

But we believe a bank can—and should—do everything in its power to help.

We do.

We have branches and offices of subsidiaries (48 to be exact) all over the world to keep us abreast of local market information and regulations.

16th century woodcut by Hans Baldung suggests that foreign exchange was a headache even 500 years ago.

THE BETTMANN ARCHIVE

And Cenfex—our network of foreign exchange desks in major money capitals—allows us to handle transactions efficiently. With instant access to the varying rates, we can produce the most attractive exchange rates for our clients.

*But we do considerably more than* this.

We'll sit down with you. And listen.

And really try to iron out your own particular problems.

If it's a time of monetary unrest, for instance, and you ask us to evaluate your risks, we'll show you all the alternatives open to you. Then let you decide which suits your own business condition best.

We might even suggest you *not* exchange your funds at current rates. Or give you alternate banking methods which will do the same job as an exchange of funds, at less cost to you.

We might not be able to *end* all the headaches of foreign exchange.

But we'll do all in our power to ease the pain.

**American Express International Banking Corporation**

American Express International Banking Corporation has 48 branches and subsidiaries handling all types of banking transactions all over the world. We're in these major financial centers: Amsterdam, Athens (2), Basel, Bombay, Brussels, Calcutta, Cannes, Chittagong, Copenhagen, Dacca, Djakarta, Düsseldorf, Florence, Frankfurt, Geneva, The Hague, Hamburg, Heidelberg, Hong Kong, Karachi, Kowloon (2), Lahore, Lausanne, London, Lucerne, Lugano, Milan, Monte Carlo, Munich, Naples, New Delhi, Nice, Okinawa (2), Paris (2), Piraeus, Rome, Rotterdam, Salonica, Taipei, Tokyo, Venice (2), Vienna, Zurich, International Headquarters: 65 Broadway, New York, New York.

# Contract Reported Between Onassises

By Hebe Dorsey

PARIS, Nov. 2 (IHT).—How can two people as different as Aristotle Onassis and the former Jacqueline Kennedy get along? He loves ouzo and moussaka, she favors steak and milk.

The answer is that they took no chances, according to Christian Cafarakis, for 10 years chief steward on Onassis' yacht, Christina. In a book published recently by Hachette, "Le Fabuleux Onassis" (The Fabulous Onassis), Mr. Cafarakis claims that their marriage contract included 170 clauses.

[In Washington, a spokesman for Mr. Onassis today described the report of a marriage contract as "ridiculous," United Press International said.

["Honestly, there's no such thing," said Mrs. Onassis' personal secretary Nancy Tuckerman. "It's really quite unfair and unkind. It's so fabricated."]

"She says it's false," Mr. Cafarakis commented today in Paris. "I say it's true. As for the publisher, he's very happy. Fifteen thousand copies in the first edition sold overnight."

The contract, he said, was worked out between their respective lawyers and signed by the couple in New York three days before they were married in 1968 on the island of Skorpios.

### Clause I

Clause 1 stipulates that Onassis would not require Jackie to give him a child, he said. Clause 19 calls for separate rooms. Mr. Cafarakis said that Mr. Onassis is an impossible man to live with. His telephone never stops ringing. Besides, he talks to himself for hours on end—and in Greek, the ex-steward said.

That is why, he said, aboard the Christina, Mrs. Onassis sleeps in her husband's former suite while he moved his quarters to a guest room, "Lesbos." In New York, she lives in her Fifth Avenue apartment, but he kept his suite at the Pierre Hotel.

Clause 7: She must spend all Catholic holidays and summer vacations with her husband but is otherwise free to travel.

Should Mr. Onassis decide to leave his wife, he would have to shell out $10 million for each married year. But if she leaves him before five years, she will only get $20 million, plus a $180,000 yearly alimony for ten years. Should he die while they are still married, she will inherit $100 million.

Jacques Haillot-ASA Press.
Christian Cafarakis and lighter, gift of Aristotle Onassis.

The figures go on and on: $5,000 for children's expenses, $10,000 for private expenses, $6,000 for bodyguards—all in all, $600,000 that Mr. Onassis is committed to giving his wife every year.

That, of course, doesn't include the jewels. According to Mr. Cafarakis, Mrs. Onassis has accumulated 120 bracelets (50 diamond), 50 pairs of earrings, 300 necklaces and 1,000 rings. Not to mention that pair of gem-studded blue velvet slippers worth $120,000.

During an interview today, Mr. Cafarakis did not disclose how he knew about the contract. A tall, dark Greek with a crew cut, lively, shrewd dark eyes and a pleasant smile, he said: "After all, I was a butler. People talk when we're around—and sometimes, they leave papers lying around."

All through the book, Mr. Onassis comes out as penny-wise and pound-foolish.

For instance, he would send for a bottle of perfume all the way from New York to Athens, but only order the medium-sized one. That reportedly made his wife very mad. "Such a long trip for such a small bottle," she sniffed, according to Mr. Cafarakis. Or Mr. Onassis has his bread shipped to him from a Paris bakery all over the world, but he has his custom-made shirts cut ultra long to replace collar and cuffs when they fray.

Mrs. Onassis is described as a hard boss who never communicates with the Greek staff. "We're glad when she has one of her fits," Mr. Cafarakis wrote "because that way, she disappears in her room for at least two days."

She is so finicky that she insists everything be pressed "including her stockings" and her pink satin embroidered sheets must be changed "every time she drops into them, even for a siesta."

According to Mr. Cafarakis, the marriage was on the rocks a year ago. "They're too different," he said. "He likes business and bouzouki. She likes concerts and the jet set. Besides, he has a habit of undoing his necktie and his shoe laces the minute he gets to a restaurant. He is a sailor. He says so himself."

But all is well now. Mr. Cafarakis claims that Mr. Onassis spends less time on business and that his wife is learning to dance the sirtaki. And last April she bought him 365 ties at Capri.

---

### Boutique Report

MILAN, Nov. 2 (UPI).—Princess Maria Pia of Savoy, a social reporter for the Milan women's magazine Eva Express, said today in a dispatch from Paris that Mrs. Onassis and her sister, Princess Lee Radziwill, are planning to open a boutique in Rome.

---

PARIS THEATER

# *New, Vital 'Malade Imagina*

By Thomas Quinn Curtiss

PARIS, Nov. 2 (IHT).—Molière's last role proves a prize plum for Jacques Charon in the Comédie-Française's new production of "Le Malade Imaginaire." The skillful Charon plays the health-conscious Argan hilariously to the last quiver of nervous fright before his miraculous recovery in the finale.

The Charon characterization for all its surface buffoonery is deep and subtle, bridging the gap of centuries. His Argan is the contemporary morbid health-watcher in nightshirt and carpet slippers of his 17th-century ancestor.

This Argan of Molière is a self-centered neurotic who lurks in everyone, ready to leap to the fore. He howls piteously when left alone and is incapable of listening when in company unless the subject is his physical state. In 1971 he would have added a psychoanalyst to his entourage of resurrection men. But even talk about his health cannot hold him for long from his hurried trips to the *cabinet de nécessité*, from swallowing his pills every hour, or from missing one of his treatments. Behind the footlights this hypochondriac is a diverting figure of fun, a crashing bore who, thanks to the genius of his creator, emerges as an object lesson.

A transparent scrim of gauze on which is painted the exterior of a baroque mansion veils Argan's bedchamber. Dimly one catches sight of him snoozing fitfully in a four-poster. The curtain parts and the play begins, a masterpiece of theatrical vitality and comic invention, none of it smothered by production eccentricities.

Directors are often incorrectly praised for "bringing to life" some classic that has survived the centuries. This satire of Molière has been alive and vigorously kicking at superstitious quackery since February 10, 1673, when its author first played it. (He died after the fourth performance.) It is still in fine fettle and without need of directorial first aid. What its staging requires is a "live and let live" policy and director Jean-Laurent Cochet appreciates this. He has mounted it in a fashion that permits the text full range. It plays beautifully and it is beautifully played. Charon portrays the distressed monomaniac to perfection, trembling perpetually under his doctors' orders. Françoise Seigner is his mocking housekeeper who would tease him out of his self-created hell. Berengère Dautun is his treacherous wife; Catherine Hiegel, his daughter whom he would marry to a medicine man; Jacques Eyser his dominating Number One physician; Jean-Luc Moreau, the doctor's stammering son who courts his fiancée with invitations to the dissecting room; Jacques Toja, Argan's brother.

Jacques Marillier's costuming and decor handsomely set the 17th-century scene of this immortal comedy.

* * *

To open the evening there is "Les Sincères," a very infrequently performed curtain-raiser by Marivaux. Why this charming play has been so neglected is a mystery. It is filled with fun and rewarding roles, a witty warning on the dangers of plain speaking. Its main idea was borrowed from Molière's "Misanthrope," a play that has continued to inspire imitation.

"Les Sincères" is acted most engagingly at the Comédie-Française by Hélène Perdrière as the marquise who boasts of her inflexible sincerity, but is offended when her lover informs her that she is not the most beautiful woman in the world; by Claude Winter as the lady less anxious for frankness, by Michel Duchaussoy as the outspoken gallant and by Paule Noëlle and Alain Pralon as the servants.

Jean-Laurent Cochet directed again, displaying his gift for staging high comedy. His talents have long been known to those who have attended his series of classic matinees. With this evening at th Molière he receives cial recognition.

## Entertainment in New York

NEW YORK, Nov. 2 (IHT).—This is how The New York Times critics rate new on and Off-Broadway productions:

"On the Town," Leonard Bernstein's 1944 musical about three sailors on leave in wartime New York, is a "handsome and lavish resuscitation" that is "going to please those who remember its past rather than those who look to its future," Clive Barnes reports. The musical "has not the dimensions of a classic," says Barnes—"it is not Johann Strauss, Offenbach, Gilbert and Sullivan or even Jerome Kern. It does help, however, pinpoint a period." And the music—"for all its occasional shades of Aaron Copland lyricism"—does have a "brash and Broadway bounce" to it. "There is a confidence to 'On the Town' that few musicals can muster nowadays," Barnes concludes. "Unfortunately far too much of the time the confidence seems misplaced."

"Cartoon," a play by Murray Mednick, directed by Walter Blood, "though intriguing, is unfocused and inconclusive," Mel Gussow writes. Set in a futuristic world of "money, flesh and trash," the play concerns a "meshed and mysterious threesome" who escape to a beach, Gussow says. "In makeup and gesture all are cartoons, with Coolac (the hero on stage) torn right out of the funny papers. He moves his lined features stiffly, as if changing expression from panel to panel. When he speaks, in a barrage of accents from Maggie-and-Jiggs to Katzenjammer Kids; it i toon balloons were around him.

"Lib Comes High" i little play and a w earful" about a kin duper combination Anthony, Frances Germaine Gree Thompson reports. Joan T. Nourse, direc N. # *W. German Criticism Prize to Poet of East*

By Betty Falkenberg

COLOGNE, Germany (IHT).—From 1962 until last April, East Germany's greatest poet, Peter Huchel, lived in Potsdam in isolation, unable to receive visitors from the West or to leave the country and unable to print his poems there.

While Huchel was denied publication at home, he had an avid, if limited and esoteric, circle of admirers in the West. He was awarded a number of West German literary prizes, though he was allowed to "accept" none. In 1968, in celebration of his 65th birthday, a volume, "Hommage für Peter Huchel" appeared in West Germany (Piper Verlage, Munich) to which Ernst Bloch, Heinrich Böll, Nelly Sachs and other prominent poets and critics contributed.

Now, he has been given one of the most prestigious German literary awards—the prize for literary criticism of the German Academy for Language and Literature in Darmstadt.

Born in 1903 in Berlin, Huchel, who is now living in Italy, was editor of East Germany's renowned literary journal Sinn und Form from 1949 to 1962, when he was ousted by government authorities for not following the party line. The magazine had printed unpublished works by Brecht, poems of Günter Eich and Paul Celan, as well as Yevtushenko's "Babi Yar" in Celan's translation.

It was in recognition of his work on Sinn und Form that the Darmstadt academy gave him its literary criticism prize late last month.

### Poem to Him

After his removal from the magazine he was not able to publish his work. In 1966, Wolf Biermann, the East German, wrote a song dedicated to him, entitled "Take Hope":

*"Don't let yourself get hard*
*In these hard times,*
*Those who are too hard, break . . .*

*"We don't want to hush it up*
*In these hushed-up times:*
*The Green breaks out of the branches . . ."*

Peter Huchel
. . . *now in Italy.*

Now, Biermann has been hushed up, too. He can no longer perform in public nor publish.

Politically, Huchel's position defies easy categorization. He chose East Germany after the war with open eyes. Yet he opposed collectivization. At the same time, he has been sharply critical of the West, often demonstrating a naïve bias, reflecting Eastern propaganda.

His poem "Exile" expresses the two strivings within him, the one calling for change, the other clinging to roots:

*"Go with the wind,*
*Say the shadows.*
*Summer lays the iron sickle*
*On your heart.*
*Go, before the stigma of fall*
*Burns into the maple leaf.*
*"Stay, says the stone.*
*Dawn breaks where light and leaf*
*Inhabit each other*
*And the face*
*Dies in the flame."*

In "Der Garten des Theophrast," he writes:

*"Remember, my son, remember him*

*Who once grew stalks like trees.*

*They issued orders to tear up the roots.*
*Your light fades, defenseless leaves."*

The late poems are less facile and hardly ever rhymed, as opposed to the early ones. They are brief, bald, with concrete imagery, composed, as it were, "under the root of the thistle," where "language now dwells."

In April this year, Huchel was suddenly granted a visa. Was it through the successful intervention of friends? Heinrich Böll brought Huchel's plight to the attention of the International PEN Club and he was backed by writers like Arthur Miller and Graham Greene.

Or was it the effect of a letter to the Times (London) by David Carver, the secretary-general of the International PEN Club, demanding that the East German regime let him out?

The fact is that Huchel suddenly found himself on his way to Italy to the Villa Massimo (an establishment for West German writers and artists), where, with his wife and son he will spend the coming year. Speculation has it that he will settle somewhere in West Germany when the year is up.

Music in London

# Glossop as Verdi's Falstaff —Too Good to Be Pathetic

By Henry Pleasants

LONDON, Nov. 2 (IHT).—A new Falstaff is always news, if only because it is a fat part, not lightly undertaken, nor lightly taken away. At the Met, in the half century between 1894 and 1944, there were only four: Maurel, Scotti, Tibbett and Warren.

Covent Garden's Zeffirelli production of 1961 was built around the admirable Falstaff of Geraint Evans, and remained pretty much his private property until Friday night, when Peter Glossop added a tremendous paunch to a naturally substantial frame and sang the role for the first time in England.

It's a tricky business for a singer with as much voice as Glossop has. Although Verdi gave his fat knight plenty to sing, one thinks of the part as primarily a vehicle for a great comedy actor: and it is difficult, maybe impossible, to sing it as well as Glossop does and still present a comical figure, least of all a pathetic one.

And Glossop, in London, has the additional handicap of being associated with such baritone thunderers as Tonio, Iago, Rigoletto, Renato and the Conte di Luna rather than with the basso buffo parts that paved Sir Geraint's course to Sir John. Not a subtle actor at best, Glossop tends, what with handlebar mustache and flamboyant attitudes and gestures, to suggest something closer to Col. Blimp. But he sings gloriously, including even artful excursions into falsetto.

Also new to the cast was Delme Bryn-Jones as Ford. He didn't sing Glossop off the stage in Act II Scene I, as Tibbett sang Scotti that January 2 in 1925, but he stood his ground; and against Glossop that is a tidy vocal accomplishment. Scotti, in 1925, had been singing Falstaff for 30 years, and had little voice left—which, that one scene aside, is not an unbecoming infirmity in a Falstaff.

There was a new conductor, too, in Aldo Ceccato, who paced the performance admirably, and inspired the orchestra to a lively and delightful account of Verdi's orchestral masterpiece. And Regina Reznik was back in her favorite part of Mistress Quickly, hamming it up with relish and skill, and favoring us with baritonal chest tones the like of which I have not encountered since catching Tallulah Bankhead, a decade or so ago, in a road company performance of "Private Lives."

## Rummage Sale

The dates given for the biannual rummage sale, sponsored by the Pro-Guild at the American Cathedral, 23 Avenue George-V, Paris-8, in the International Herald Tribune, Oct. 30-31, were incorrect. The sale will be held Thursday and Friday Nov. 4 and 5.

# Chaplin Films Go on View in Paris Theaters

PARIS, Nov. 2 (IHT).—Charlie Chaplin, 82, arrived in Paris today to attend a revival of "Modern Times," his movie which has not been seen by the general public in 20 years.

"France has a special meaning for me," he said. "I think the French understand my films better than anyone else."

"Modern Times" will have a by-invitation-only showing tomorrow at the Paramount-Elysées. Thursday, it goes on the bill at Publicis-Elysées and the Paramount-Odéon. Nine other Chaplin films will be seen in Paris this fall. Mr. Chaplin recently signed an arrangement with Blackink, Ltd., for a reported $5 million, giving the company worldwide distribution rights for all media, including television.

## *Soviet Union Finds Old Buddhist Temple*

MOSCOW, Nov. 2 (UPI).—Archaeologists have discovered a 1st-century BC Buddhist temple in the Soviet Union, Tass news agency said.

The experts said the temple was found near Termez, Uzbekistan.

Under a layer of brick covering the tower, specialists found pictures of lotus flowers and circles—symbolic images of Buddha—on a smooth plastered surface, Tass said.

# Toyota, Nissan Report Increased Sales and Profit

From Wire Dispatches

TOKYO, Nov. 2.—Two major Japanese auto manufacturers, Toyota Motor Co. and Nissan Motor Co., have announced increased sales and profit for the half-year ended Sept. 30.

Toyota said profit rose 6.5 percent to 5.2 billion yen ($14.4 million at official parity) from 4.88 billion yen in the previous six months.

Sales increased 14.6 percent to 557.1 billion yen from 486 billion yen. The company announced an unchanged dividend of 3.75 yen.

Nissan said its profit rose 7.8 percent to 15.2 billion yen from 14.1 billion yen in the comparable half-year of 1970. Sales were 460.3 billion yen, up 20.4 percent from the previous 382.3 billion yen.

Nissan declared a semi-annual dividend of 3 yen per share plus 2 percent stock, compared with 4 yen per share a year ago.

**Other Reports**

TOKYO, Nov. 2 (AP-DJ).—Mitsubishi Electric Corp. said profit fell 36.7 percent in the first half ended Sept. 30. Profit was 3.1 billion yen, down from 4.9 billion a year earlier. Sales were 202.6 billion yen, up from 199.4 billion.

The company declared a semi-annual dividend of 2.5 yen, down from 3 yen a year earlier.

Asahi Chemical Industry Co. said half-year net fell 26.3 percent to 2.8 billion yen from 3.8 billion a year earlier. Sales rose to 136.89 billion yen from 116.6 billion.

Asahi declared a semi-annual dividend of 1.5 yen per share plus 4 percent stock, unchanged.

Teijin Ltd. reported earnings for the half-year dropped 48.9 percent to 3.5 billion yen from 4.9 billion a year ago. Sales rose to 112.7 billion yen from 106.5 billion.

Teijin set an unchanged 3-yen dividend for the half year.

# Fear Grows In Canada of U.S. Moves

## Experts See Lasting Damage to Economy

By Neil Harrison

TORONTO, Nov. 3 (Reuters).—Canadian economists are becoming increasingly fearful that measures to solve U.S. balance of payments problems could have irreversibly damaging effects on the Canadian economy.

U.S.-Canadian negotiations are continuing on whether Canada should be exempted from U.S. measures designed to protect the hard-pressed dollar. Toronto economists say that failure of the talks could lead to soaring inflation in Canada and an unprecedented level of unemployment by the end of the winter.

The basic Canadian argument for exemption from such U.S. moves as the imposition of a 10 percent surcharge on imports is that U.S. economists are publicizing only one side of U.S.-Canadian economic relations—the side which favors Canada.

Much has been made in Washington of the fact that Canada had a merchandise trade surplus with the U.S. of $1.38 billion last year—the first surplus after many years of deficits.

Canadian economists say that U.S. experts overlook other and more significant facts when they point out that Canada sold more manufactured goods to the U.S. than it bought.

The full extent of U.S. involvement in the Canadian economy is difficult to document but figures generally cited here show that nearly two-thirds of the factories operating in Canada are U.S.-owned and about 90 percent of companies employing more than 5,000 people are American-owned and controlled.

The result of this is a constant and steadily growing flow of Canadian money to the United States which helps pay for American investments in Canada.

Canadians say the real balance of payments between the two countries shows a current account surplus of only about $12 million when this is taken into account.

Unemployment is already the No. 1 political headache faced by Canadian Prime Minister Pierre Trudeau.

The Economic Council of Canada estimates that more than 2.5 million new jobs will be needed in the coming decade, just to take care of new job-seekers coming onto the labor market.

In addition to the unemployment problem, there is a danger, according to leading Canadian economists, that the U.S. measures will put Canada irretrievably under U.C. control by making this country unable to pay debts across the border.

Canada's only bargaining power lies in its energy resources—a commodity of which the U.S. economy is in growing need.

But this bargaining pressure could be applied only over a longer time-scale than the immediate crisis. In the short term, there are fears that U.S. actions could shatter the present relative prosperity of the average Canadian.

# *Economist Sees Dow at 500 in 1972*

*NEW YORK, Nov. 2 (NYT).—The Dow Jones industrial average could fall to the 500 level next year, according to Eliot Janeway, who is widely known in the United States as an author, lecturer and television-show guest.*

*The following are excerpts from a recent conversation between Mr. Janeway, who prefers to call himself a "political economist," and Vartanig G. Vartan, of The New York Times staff.*

*The talk took place before the 13.14 point plunge of the Dow average yesterday. That decline carried the Dow to its low for the year—825.86.*

QUESTION—Forecasting the stock market is a very tricky business. But you have scored some remarkable success in recent years. What do you regard as your outstanding forecasts?

ANSWER—In 1965, I said the Dow Jones industrials would go to 1,000. They peaked out at 996 in February, 1966. My prediction for the bear-market bottom in 1970 was 625. Again, I was a few points off. It bottomed out at 631.

Q—Do you regard yourself as someone with a special crystal ball for the stock market?

A—Let me make one thing clear. I am not in the market guessing game. Nor am I a market technician.

Q—Then how do you regard your role?

A—It's to diagnose the pragmatic upshot of each market swing as to whether there's going to be a happy or an unhappy landing. My ole is to be an advisers' adviser.

Q—But you've had some forecast misses, too. Would you cite a recent example?

A—I've been wrong over the last month. I thought there would be a last-chance rally, with the Dow moving up to 915 or 920. But a pre-Phase 2 rally never got off the ground.

Q—What do you see on the market horizon at the present time?

A—The stock market doesn't have a chance of coming back with the public leaving it. I see the Dow getting down to 500 in 1972 as a test level.

Q—Pardon me, Mr. Janeway. You said 500?

A—Yes. And I'm not saying that 500 will be the low. I would want to see what political confidence is at that time. And whether the public is still leaving the market and whether the government is making any progress towards working out of its busted condition.

Q—But 500 on the Dow would put it 131 points below the bear-market bottom in May of last year. Why does the market have to fall that far in your estimation?

A—Because the Dow industrials will be driven down to a 6 percent yield basis before they can become attractive again. They now yield only 3.7 percent. The departure of the amateur investor out of industrials and into bonds has hurt the stock market fatally. The druggist's wife in Dubuque is paying more and more attention to yields—and so are fiduciaries.

Q—In your opinion, what should the average person do with his money today?

A—The number one objective is to hang onto it. I've been saying that inflation's going to get worse. I've written an entire book on that subject. It's called "What Shall I Do With My Money?"

Q—Would you mind explaining your position a bit further?

A—I've been bullish about the American economy until October of 1970. The General Motors strike was the sea change. What it really did was to precipitate a sympathy strike by business buyers and a strike by consumers. I was bullish about the world economy until April, 1971, when the Germans started the dollar crisis, which I think is phony but which has resulted in the international monetary crisis which is real.

Q—What can get the economy moving again?

A—I say there's only one hope. A reactivation of business buying. Inventory buying, people, buttons, string, right down the line.

Q—What is your opinion of Phase 2?

A—It's Operation Tanglefoot. An exercise in stimulative restraint. That's self-contradictory. The most important question about Phase 2 is how quickly Phase 3 will start.

Q—What's your estimate of how long Phase 2 will last?

A—I think you'll begin to hear talk about Phase 3 around the end of November. But in Phase 3 you'll be creating intolerable conditions, with wages going up and the economy slackening.

Q—Mr. Janeway, your view of where the stock market is headed contrasts with that of many of the so-called experts and analysts on Wall Street, as well as that of most economists. How do you account for this sharp divergence?

A—If computers were people, the economists and the others would not be wrong. This is not a numbers game, it's a people game. The Wall Streeters are disoriented. What's really happening boils down to this: The money user is on strike.

Q—And the money user won't start spending until confidence is restored?

A—Correct.

Q—Does this mean Mr. Nixon won't win in 1972?

A—Nixon will get thoroughly Hooverized unless he can make Phase 3 work. He's got to be ready before next Easter.

### *But Supply Seen Ample*

# Analyst Says Demand for Credit Will Rise

By H. Erich Heinemann

NEW YORK, Nov. 2 (NYT).—The total demand for funds in U.S. credit markets will rise substantially in 1972, an economist predicts. But, because the supply of credit is expected to be ample, upward pressure on interest rates should be limited.

In one of the first detailed, published forecasts of the supply of and demand for funds next year, Sally S. Ronk, vice-president and economist at Drexel Firestone, Inc., estimated that total demand for capital would come to $166.3 billion in 1972, up from an expected $148.1 billion this year and only $104.9 billion in 1970.

Dr. Ronk, who was a pioneer in the analysis of the flow of funds in the capital markets during a quarter-century at Bankers Trust Co., predicted that a decline in the demand for long-term funds by corporations next year would be more than offset by substantial increases in short-term credit needs, by a surge in consumer borrowing and by a large jump in the net credit demand of federally sponsored agencies.

**Major Swings**

On the supply side, Dr. Ronk's analysis showed a number of major swings. For example, foreign investors (chiefly foreign central banks) are expected to supply $19.3 billion to the U.S. capital markets next year, compared with only $1.5 billion in 1970.

Similarly, thrift institutions—savings and loan associations, savings banks and credit unions—should supply $29.3 billion during 1971 (mostly to the mortgage market) but this should drop next year.

The offsets to these contractions, Dr. Ronk predicted, should come chiefly from business ($15.7 billion in 1971 and $25.1 billion in 1972) and government ($6.5 billion to $12.6 billion) and a swing from a minus $15.8 billion to a plus $8.8 billion in the "residual"—the supply of funds to come from sources that cannot be otherwise identified.

"In and of itself," she said, "the heavy prospective volume of demands on the credit markets sounds alarming and suggests intense upward pressures on interest rates. But before we become overly concerned, we should look at the volume of funds flowing to savings and other institutional investors that are available to meet these demands."

In her analysis, Dr. Ronk assumed that the gross national product would total about $1,145 billion in 1972, up almost $100 billion from this year, that the Federal Reserve would pursue an "even-handed" policy that would increase the money supply by 6.5 percent and that corporate profits would be up 19 percent.

# Industry's Income Declines, Broker's Prospectus Reveals

By Terry Robards

NEW YORK, Nov. 2 (NYT).—Reynolds Securities Inc., a major Wall Street brokerage house, experienced a sharp earnings decline in this year's third quarter as a result of a slowdown in trading volume in the stock market.

The decline, which came to light in a newly issued prospectus for the concern's proposed public offering, provides an indication that third-quarter revenues contracted sharply in the securities industry. Reynolds has in recent years been one of Wall Street's most profitable houses.

The firm reported that pro forma net income in the three months through Sept. 30 totaled $1.53 million. This compares with a net of $6.25 million in this year's first half. No quarterly breakdown was provided for the half-year total.

The third-quarter total indicated that the Reynolds rate of earnings had been roughly halved from the first-half rate. The results are listed on a pro forma basis because the firm was a partnership prior to Sept. 1. Accounting for partnerships differs from accounting for corporations.

The earnings decline was attributed by the firm largely to "a decline in securities trading volume." This decline for the quarter was experienced by most of the securities industry and was not restricted to Reynolds.

When compared with earnings in the third quarter of last year, Reynolds experienced an earnings gain in the comparable span this year. The indicated pro forma net for the 1970 period was $1.17 million, or $353,000 less than in the 1971 period.

# N.Y. Prices Turn Up After Steep Early Fall

By Vartanig G. Vartan

NEW YORK, Nov. 2 (NYT).—Prices on the New York Stock Exchange steadied today to finish slightly higher, following yesterday's sharp plunge that sent the Dow Jones industrial average to a 1971 low.

The Dow industrials gained 2.12 to close at 827.98, thus posting only its third advance in the last 15 sessions.

Yesterday's setback amounted to 13.14 points—the worst break in 2 1/2 months—and selling pressure continued to send prices downward after the opening bell today.

At 10:30 a.m., the blue-chip indicator was behind 7.23 and hearts were sinking on Wall Street. Then came the turnaround and prices began to improve steadily.

At 11 a.m. the average was down by 4.09 and, half an hour later, it had edged into plus territory. "The market found a little support and there was some short covering in glamour issues," noted one brokerage-firm official.

**Ripe for Recovery**

A month ago, the Dow industrials were knocking on the door at 900. The steady pullback in recent weeks, brokers said, made stock prices ripe for at least a technical recovery.

The only other advancing sessions during the last 15 trading days came on Thursday and Friday of last week. Both gains ran slightly in excess of a single point for the industrial average.

Volume rose today to 13.33 million shares from yesterday's slow pace of 10.96 million shares.

The active list told the story of today's market, complete with cross currents, in its own way. It contained both gainers and decliners, but no changes of more than a fraction of a point. Yesterday, all of the 15 most actives finished lower.

Wall Street analysts kept scanning the gray clouds in search of silver linings. "There's lots of cash around," reported one broker, "but the main haven for funds now seems to be the bond market and savings institutions."

American Stock Exchange prices were weak as declines led advances, but the exchange index was unchanged.

# *Limit Set on Payout Hikes*

WASHINGTON, Nov. 2 (AP-DJ).—The Committee on Interests and Dividends today requested corporations to limit dividend increases to 4 percent in 1972.

The base to which the principle will be applied is the total amount per share adjusted for stock dividends and splits paid in any of the corporations' fiscal years ending during 1969, 1970 or 1971.

The new standard will apply to dividends paid after Jan. 1, 1972.

Dividends paid prior to that time remain subject to the President's request that dividends not be increased, the committee said.

Guidelines specifying coverage exemptions and other technical details expected to be observed under the voluntary program administered by the committee will be issued by Nov. 15.

# One Dollar—

LONDON, Nov. 2 (AP-DJ).—The following are the late or closing interbank rates for the dollar on the major international exchanges:

| | Today | Previous |
|---|---|---|
| Ster. ($ per £).. | 2.4928 | 2.4921 |
| Belgian franc... | 46.50-55 | 46.55-.59 |
| Deutsche mark | 3.336 | 3.3378 |
| Guilder............ | 3.35 | 3.351875 |
| Swiss franc...... | 3.988-.989 | 3.9960-70 |
| Yen................ | 328.97 | 329.0 |

# *Figures for OTC Confirm Volume To Be Substantial*

NEW YORK, Nov. 2 (NYT).—Volume statistics for the U.S. over-the-counter (OTC) market became available yesterday for the first time and confirmed that trading in unlisted stocks is substantial.

The National Association of Securities Dealers, the self-regulatory agency for the OTC market, reported turnover of 6,200,800 shares for the day, sharply higher than the volume of 2,842,000 shares on the American Stock Exchange.

The volume of trading in shares listed on the major stock exchanges has traditionally been reported. But volume for the shares not listed on the exchanges could not be computed before the startup of NASDAQ—an acronym for National Association of Securities Dealers Automated Quotations.

The NASD had reported previously that preliminary studies had indicated that OTC turnover would normally exceed the cumulative volume on all of the registered exchanges in the country, except for the New York Stock Exchange.

NASDAQ volume on a weekly basis was expected to be about half of Big Board volume. Yesterday, the over-the-counter turnover was somewhat more than half the Big Board's 10.96 million shares.

Because of the sharply declining market yesterday, however, it was considered possible that volume distortions existed.

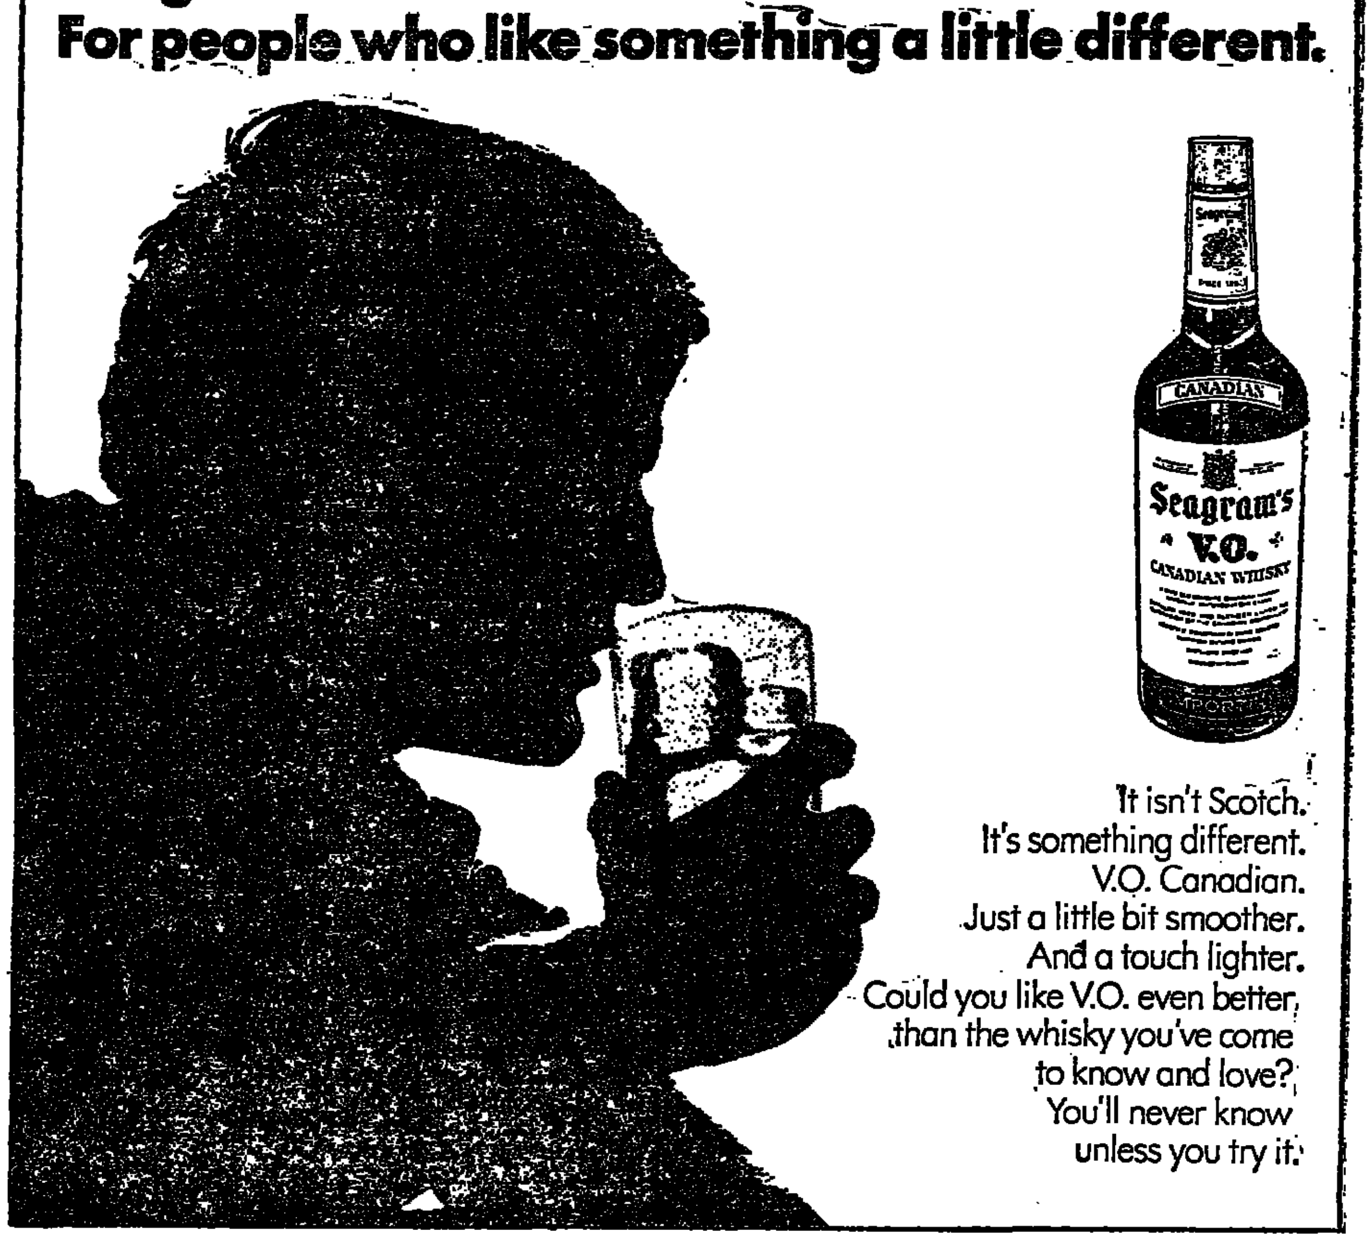
**Seagram's V.O. Canadian: For people who like something a little different.**



It isn't Scotch.
It's something different.
V.O. Canadian.
Just a little bit smoother.
And a touch lighter.
Could you like V.O. even better,
than the whisky you've come
to know and love?
You'll never know
unless you try it.

*All of these securities having been sold, this announcement appears as a matter of record only.*

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. —Annual rate plus stock dividend. c—Liquidating dividend. d—Declared or paid in 1971 plus stock dividend. e—Paid last year. f—Paid in stock during 1971, estimated cash value on ex-dividend or ex-distribution date. g—Declared or paid so far this year. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in 1970 plus stock dividend. t—Paid in stock during 1970, estimated cash value on ex-dividend or ex-distribution date.

c'd—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

AGENTS

**BUSINESS PERSON WANTED**

Now available for the first time to the public! An exclusive development in cosmetics from one of the world's oldest and most prestigious motion picture companies which, for over 50 years, has given its stars eternal beauty.

We are looking for a personable and ambitious person to fill the exclusive concessionaire opportunity, now available, that offers vast profit potential handling the beauty secrets of the stars.

If you have the capability to accept the challenge by building and controlling a sales force of beauty consultants, and if you can finance an initial inventory of $125,000, we would like to hear from you. If accepted, you will receive training at our headquarters.

*For more information, write us about your background, your financial status, your full address and exact phone number to:*

We will then arrange a personal confidential interview.

**Box D-2,861, Herald Tribune, Paris.**

RESIDENCE

**LUXURY VILLA SPAIN**

Garden direct on golf. Views Mediterranean. Architect built 1970. Three large bedrooms, 2 air-conditioned, bathrooms en suite, double garage, main services. Furnished. Marble floors. $89,000.

GEE, Banco Rural y Mediterraneo, MARBELLA, Malaga, Spain.

RESIDENCE

**Majorca: $825,000**

**Ancient seniorial manor Dream House**

Most exciting on the island, near no tourists, plenty of water, white marble swimming pool, luxurious gardens and many fountains, utter peace and beauty, completely renovated and modernized. An artistic triumph, partially furnished with rare antiques. Lovely Chapel. Must be seen to be realized. Write: Box 255, Herald, Pl. C. V. Sachil 7, Madrid-15, Spain.

COMMERCIAL REALTY

**ROME**

Large block of buildings in the construction stage, facing four streets, and consisting of:
HOTEL - RESIDENCE - APARTMENTS
OFFICE PREMISES (about 1,200 rooms in all)
and LARGE GARAGE
IN THE VERY CENTER OF ROME
Via Boncompagni (Via Veneto)

**ON SALE**

*For information apply to:* SOCOGEN s.p.a.
I-20122 MILANO (Italy) — Piazza Missori No. 2.

# BRIDGE

By Alan Truscott

A rare safety play is needed on the diagramed deal. However, two world-famous stars missed it when the deal was played in a recent U.S. tournament.

At both tables South landed in five diamonds doubled, although by very different routes. In one case, as shown, East opened in third seat with one spade and South made an overcall of two diamonds.

For system reasons, West made a negative double instead of supporting spades, and South jumped to four clubs. When North showed a preference for diamonds, South went on to game, and was doubled by East.

West led the spade king and shifted to the diamond three. Dummy's six was covered by the eight and taken by the ten in the closed hand. The declarer led the club queen, which East took with the ace.

At this point, instead of playing a trump as the declarer expected, East played the spade ace. The reason for this became clear when South ruffed the spade lead and led a low club for a ruff. East over-ruffed, and South had to lose two more club tricks to West eventually, going down three.

As South could not avoid losing two club tricks, he might have made his first club lead a low card. As it happens, this would have driven out the ace and saved a trick. In addition, if the club did not appear immediately, South would have preserved the option of leading low in the next round of clubs if he judged that East had begun with a doubleton ace.

# BOOKS

## WHAT HAPPENS NEXT?

By Gilbert Rogin. Random House. 260 pp. $6.95.

Reviewed by L.E. Sissman

I think Gilbert Rogin has written a great novel, the first new one I've run across in quite some time. Which is as it should be: great novels, almost by definition, should be rarer than trumpeter swans. The odd thing about "What Happens Next?" is that it's almost not a novel at all. The work of an accomplished short-story writer, it was first published as a series of stories in several magazines over the last five years. Now that these 22 pieces have at last been brought together in a book, they still retain a shade of the disjunctiveness of individual stories, the more so since they vary widely in form and experimental technique. But the intensity of Rogin's central vision and the virtuosity of his prose are such that they cohere and build more surely, perhaps, than a formal, one-piece novel could have done.

What is the nature of "What Happens Next?" At the beginning, it could be taken for a comic Jewish New York novel; the first chapter introduces Julian Singer, a 35-year-old sportswriter whose ex-best friend accuses him of having "an upper-middle-class, upper-West Side, Jewish-Ethical Culture outlook." It seems to contain echoes of Salinger (New York apartment-dwellers' family life), Bellow (the decadent melancholy of Verdi Square), Roth (the loneliness of the long-distance loser), and especially Perelman (surreal, hilarious conversations among television types). But in the second chapter, a blow-by-verbal-blow description of Singer's strangled relations with his second wife, the book begins to become something far richer and stranger than any mere comic account of city life. Moving in dozens of short movie takes from confrontation to soliloquy to fantasy to dream, it shapes the whole history and predicament of its protagonist out of a solid, six-year block of time.

The tools—the media—of this almost sculptural process are differentiated according to the subject that they treat. Thirteen of the chapters, those largely devoted to fixing Singer in time and place and his relations with others, are told in the third person. The others, largely devoted to an exploration of his interior life, are told in the first.

After three third-person chapters at the beginning, the fourth, in the first person, is a mysterious and beautiful evocation of Singer's parents through his dreams about them. The sixth chapter, posing as a two-page story (by Singer) about his parents' meeting, provides a pretext for footnotes that lovingly adumbrate their characters as they criticize the fragment. The eleventh chapter contrasts the shaky rectitude of Singer with the defiant backsliding of Skippy Mountjoy, his wife's first husband, not only in the present but through the stilted, weaseling medium of their old grade-school reports. And so on through the book. No two chapters are quite alike—but each invents new spanners, sockets, chisels and burins to do justice to its theme.

These tours de force of technique conjure up the cast characters not in one but many incarnations. People w first appear as near stereotyp though brilliantly rendered on like Singer's parents (his moth by a feat of perfect pitch, stan revealed by her conversation the spokesman of her pompou comfortable, sure generation mutate under shifting circumstances and viewpoints into th unassailable mysteries all people really are. Characters lik Singer's wife, Daisy, grow in reality as they diminish in predictability, advancing to and receding from the central figure coolly joking and hotly weeping in a constant, thwarted bi for notice.

Though Rogin's novel proceed with great verve and energy t create a certain kind of Ne York family and its relatives an friends, it is simultaneousl creating something more: th universal character of Julia Singer, who, in his lostnes transcends origin and place an becomes some kind of archetyp cal American man. Every scr every line, every joke is in service of this artfully life portrait of ourselves. Julia isolation, his anxieties, his gui his fumbling uncertainties, h comical losses, his failure to e tablish belief in himself, are once existential, contempora ailments and part of the tim less human estate.

This book, so dense in det that it seems to build a who forest of circumstance out hundreds of tiny, individual tre could be forgiven for lacking climax beyond the weight of th sum of its parts. Yet it has on and a dazzling one at that. the final chapter, Julian, pe haps having run away fro home, perhaps only on a bus ness trip (these constant am biguities, so typical of our la of self-knowledge, lend a que tioning depth to the entire n vel), sees a putative but unlike orgy—four couples, peeled their underwear, swimming the pool of a West Coast mot late at night—and considers th life story he might tell the from his balcony, a story th demonstrates, in terms of casu familial incident, the impossibili of finding our identity.

He recounts an epiphany— incident in a Fort Lauderda bar—that led to the revelatio of a road not taken. He recou a mystery, a faint whine hea in the country at night, wh solution (his wife breathing her sleep) led only to a deep mystery. He recounts the vanis ing of his stepson and ste daughter as people he h known, grasped, and brie dominated. He decides, sad that the only purpose of his li is to relate it, that he is only arranger and rearranger of my teries.

I hope I've made it clear now that to my mind "Wh Happens Next?" is a novel of th first importance. I hope you read it.

### 14-14 Game Scoreless in 2d Half

# s, Packers Splash to Tie

Nov. 2 (AP).— and Green Bay a 14-14 tie last ayed in a driv- and a muddy ms scoreless in he tie left the ce in the Cen- the National e with a 4-2-1 rd. Green Bay ons' first game l wide receiver o died of arteriosclerosis during a game against Chicago Oct. 24. The Lions wore black arm bands of mourning last night.

Before the game, running back Steve Owens said, "It was impossible to concentrate on getting ready for a football game this week."

The Lions had one drive ended by a fumble and had a 32-yard field goal blocked last night as they tried to break through a scoreless second half.

Detroit battled back to gain a tie, scoring the tying touchdown with 17 seconds left in the first half on Greg Landry's 49-yard pass to Charlie Sanders.

The Lions' other touchdown came in the first series of the game, when defensive tackle Bob Bell picked up a fumble by Green Bay quarterback Scott Hunter and raced 25 yards to score.

The Packers tied it on Dave Hampton's two-yard run in the first quarter. They took the lead when Hunter dove one yard for a touchdown with 58 seconds to play in the half.

Just 41 seconds later, Landry had the Lions even, but only the rain made any impression after that.

Washington Post

—The Redskins' Ted Vactor, No. 29, rides odd to the ground on kickoff. Washington on to beat New Orleans, 24-14.

### Neely Out

DALLAS, Nov. 2 (UPI).—Offensive left tackle Ralph Neely will be lost to the Dallas Cowboys for the rest of the season after dislocating his left ankle and fracturing a bone in his left leg while riding a motorcycle yesterday.

Coach Tom Landry said he would probably start Don Talbert in Neely's position and former Green Bay Packer Forrest Gregg probably would be activated as a backup man. Gregg was picked up on waivers earlier in the season.

"Obviously, we are sorry for both Ralph and the team," Landry said.

A team spokesman said Neely was riding with several teammates near a Dallas-area lake when he caught his left toe in some underbrush while moving at about 10 miles an hour. His ankle was dislocated and the fibula in his left lower leg was fractured. Neely, 6-foot-6, 265 pounds, is a seven-year NFL veteran and a graduate of the University of Oklahoma. He joined five players injured in Sunday's loss to Chicago.

The Cowboys said Bob Hayes has a strained groin muscle; Cornell Green fractured a thumb; Herb Adderley irritated an old leg injury; Rayfield Wright bruised his knee and Tom Stincic bruised a shoulder.

Adding to the Cowboy woes, defensive end George Andrie was taken to a hospital last night complaining of abdominal and chest pains. After a thorough examination, Andrie was released, but it was not certain if he would play Sunday.

playing for the nderstand," said who thought he all into the end two, but was been short "by thumbnail." e taught to play d. "But the tie helps us more than the Chiefs."

The teams remain tied for first place in the American Football Conference West with a 5-1-1 won-lost-tied record and meet in Kansas City Dec. 12, the next-to-last regular season week. Before and after that game, Oakland plays only one team—Baltimore—with an above-.500 record. The Chiefs play three: Cleveland, Detroit and San Francisco.

Willie Richardson was a great receiver before Baltimore and Pittsburgh traded holdouts in the summer of 1970—Richardson for Roy Jefferson. The Steelers decided to go with young receivers and sent Richardson on to Miami. Willie sulked and the Dolphins released him last summer. The Colts picked him up and last Sunday he started ahead of Eddie Hinton.

The result was two scoring passes from Earl Morrall. "Willie has the smarts," said Morrall. "I had to throw the ball in the outside corner of the end zone so it couldn't be intercepted. He appreciated that and came back and caught it."

Richardson had a word for Pittsburgh—"I was glad to leave, it's not a good football town."

Bobby Douglass, who has led the Bears to two straight victories, is often accused of throwing the ball too hard. "I've always thrown bullets," said the left-hander. "A professional can catch the ball."

Dick Gordon is a professional. He caught a 28-yard scoring pass on Mel Renfro, one of the best cornerbacks, as the Bears beat Dallas. The Cowboys' Mike Clark missed three field goals between 25 and 43 yards and coach Tom Landry gave up on alternating his quarterbacks on every play.

The 49ers put two defenders on little Randy Vataha, the Patriots' best receiver, and he caught only two passes for 28 yards. The Patriots failed to double-team Gene Washington, the 49ers' best receiver, and he caught five for 160 yards. "I'll take that every time," said Washington.

The victoryless Buffalo Bills blocked a field goal but were penalized for having had too many men on the field, so St. Louis went on to score a touchdown Sunday. "Our mistakes," moaned O. J. Simpson. "We got to keep plugging. All you can do is look to next week."

Tom Prothro, the new Ram coach, said after his team had lost to Miami: "We must have made a thousand mistakes. I've been in this league half a season and learned you can't make mistakes and win."

# *Stewart Set to Drive McLaren in Can-Am*

By John S. Radosta

NEW YORK, Nov. 2 (NYT).—Jackie Stewart has walked out on the L&M Lola team in the Can-Am series to join, if other pieces of a jigsaw can be put together, the Gulf-McLaren team.

For the McLaren team, which has just won its fifth consecutive Canadian-American Challenge Cup championship, signing up the two-time world driving champion is a case of the rich getting richer. But it is bad news for the Can-Am series, already plagued by a lack of competitive racing.

Finally, it is a disaster for Carl Haas, entrant of the Lola T260-Chevrolet that Stewart raced in the 1971 Can-Am, which ended Sunday at Riverside, Calif. Haas has only a few weeks in which to assemble another car-and-driver package attractive enough for the L&M Tobacco concern to sponsor in 1972.

Stewart does not believe in gracious losing. "Show me a gracious loser," he says, "and I'll show you a loser." At 32 Stewart is not certain how many racing years he has left, but he wants to close out his career with strings of victories.

Stewart was unhappy with the Lola T260, a hodgepodge car that was never completely developed. He had won only two races from the McLarens, both by lucky breaks rather than by superior machinery.

So last week, a few days before Riverside, Stewart broke the news to Haas. He is understood to have said that while a new Lola might have a good chance to win in 1972, "the other way I'm guaranteed."

"The other way" was an offer from Teddy Mayer, the McLaren manager, to drive a McLaren in 1972.

How does this affect the present McLaren drivers, Den- Hulme and Peter Revson? Hulme, Can-Am champion in 1968 and 1970, will stay. The plan is for Revson, winner of the 1971 championship, to race McLaren cars on the Formula One grand prix circuit and in selected United States Auto Club races, including the three 500s.

This is the route Revson himself prefers.

But enter an obstacle. Revson is the first American to win the Can-Am title, and there are money-handling people around him who say it would not be "right" for him to leave the Can-Am. As an American, Revson is a natural for promotional "pizazz" (Revson's word) and these people, whom Revson does not care to identify, are putting pressure on him to stay in the Can-Am.

If Revson stays in the Can-Am, it means the Stewart deal is off. "But that doesn't bother him" Revson said in a phone call today from his base in Redondo Beach, Calif. "Stewart is Stewart, and he can always make another deal."

Haas, in a telephone interview from his office in Highland Park, Ill., said a new Lola could be finished in time for testing in December in the south of France. He also said he was negotiating with several "world-class" drivers.

## *Cowboys Play Saints on Film*

PARIS, Nov. 2 (IHT).—The Dallas Cowboys face the New Orleans Saints tomorrow on the screen at the Cinema le Triomphe here in the National Football League's game of the week as presented by American Express and Trans World Airlines.

Admission to the film—which will be shown at 12:15 p.m. and 1 p.m.—is free.

# *Detroit Coach Is a Loser In His Debut*

### Red Wings Beaten By Maple Leafs

TORONTO, Nov. 2 (AP).—Ron Ellis scored three goals last night to lead the Toronto Maple Leafs to a 6-1 National Hockey League victory over Detroit and spoil John Wilson's debut as coach of the Red Wings.

Center Norm Ullman assisted on all three goals by Ellis and set up one of two scores by left-winger Paul Henderson.

Ellis delivered a goal in each period, while Henderson scored in the second and third periods. Dave Keon collected the other Maple Leaf goal, in the last stanza.

Tim Ecclestone scored the only Detroit goal, a tally with 34 seconds gone in the third period that cut the Maple Leaf lead to 3-1 before their three-goal barrage in the final period.

Wilson replaced Doug Barkeley, who resigned as coach Sunday night.

The morning after he suddenly quit as Red Wing coach, Barkley said, "I just couldn't live with the pressure of the fans booing."

Barkley knows what pressure is. He was one of the league's top defensemen for four years before losing an eye in 1966. Barkley, who took over at the end of last season, was on a one-year, $35 000 contract that will now be fulfilled "in some capacity," according to the Wings.

"I couldn't stand around and see this club go under," said Barkley. Before Sunday night's game he told his boys, "Win this one for me." They did, toppling Pittsburgh, 3-1.

Booing also cost Detroit a basketball coach Bill van Breda Kolff of the Pistons.

"The Detroit fans are supposed to be very good ones but I don't think they are insofar as loyalty is concerned," Van Breda Kolff said after quitting Monday.

"The fans really get to you, especially when you hear them say how dumb you are and things like that.

"Coaches are not machines or hardened pros who can shake off the booing of the fans just like that. On the road, you expect the boos but not at home."

**Monday's Result**

Toronto 6, Detroit 1 (Ellis 3, Henderson 2, Keon; Ecclestone).

## Player's Victory Over Nicklaus Worth $10,000

BRISBANE, Australia, Nov. 2 (AP).—South Africa's Gary Player defeated Jack Nicklaus by one stroke in a $10,000 winner-take-all match here today.

Player took the 18-hole event with a 3-under-par 70 to Nicklaus's 71, at the Keperra Golf Course.

Nicklaus lost the lead on the second green when his second shot hit a spectator on the head, deflecting the ball 25 yards into the rough behind the green.

The spectator was uninjured but Nicklaus, after chipping onto the green, took three putts for a bogey. He never again regained the lead.

After the *front* nine, Player was two strokes in front with 37. Nicklaus repeatedly outdrove Player but the South African was more consistent approaching the greens.

## New York State Takes Away Title From Napoles

NEW YORK, Nov. 2 (NYT).—The New York State Athletic Commission yesterday withdrew recognition of the world welterweight champion, Jose Napoles of Mexico, and suspended him along with his manager, Alfred Cruz.

In a statement issued by the commission's chairman, Edwin B. Dooley, Napoles was charged with failing to fulfill a contract with the Canastota Boxing Club of Syracuse. The commission also urged "recognized fight promoters to undertake an elimination tournament among leading welterweight contenders to determine a new champion."

Dooley said: "Napoles and Cruz entered into a contract on April 29, 1971, with the Canastota Boxing Club, Inc., to engage in a boxing contest with an opponent to be selected by the Canastota Boxing Club, Inc., within 120 days after the championship bout with Billy Backus on June 4, 1971, providing Napoles regained the title."

Napoles regained the title by stopping Backus in eight rounds in Los Angeles. Backus had won the title in four rounds against the Cuban-born Mexican citizen in Syracuse Dec. 3, 1970.

# New Pro Hockey League Introduces 10 Franchises

By Gerald Eskenazi

NEW YORK, Nov. 2 (NYT).—In a meeting charged with rampant optimism, the fledgling World Hockey Association yesterday named 10 franchises that will begin play next year, and announced that the colorful WHA puck will be dropped for the first time on Oct. 14, 1972, in Miami.

There were repeated allusions to the National Hockey League, the most powerful professional hockey loop in the world, as representatives of the new entries predicted a successful rivalry.

The WHA's president, Gary Davidson, a lawyer from Santa Ana, Calif., said the league was looking for two more franchises—one from the Southeast and one from New England.

Nine of the present franchises, he said, had already received dates in arenas for the 1972-73 season. But the one team that doesn't have a place to play could be critical to the league's success. That is the New York entrant, led by Neil Shayne, a Woodmere, N.Y., lawyer.

The franchises, in addition to New York, are: Ohio (Dayton), Chicago (a Northwestern suburb), Los Angeles, San Francisco, Miami, St. Paul, Winnipeg, Manitoba, and Edmonton and Calgary in Alberta.

### Colored Puck

Bill Hunter, one of Canada's most prominent hockey personalities and the executive vice-president of the Edmonton franchise, said players would be acquired "from the junior ranks, from amateur and professional hockey, and from international teams."

In addition to using a colorful puck to replace "the drab one in existence today," the WHA plans to use a 10-minute sudden-death overtime period to prevent ties in regular-season games.

But the most innovative aspects of the new league are in the area of the highly controversial players' contract. There will be no reserve or option clauses in the contracts.

### An Added Attraction

"We want it to be attractive for players to join our league," explained Davidson.

From time to time, there have been congressional hearings in the United States on the legality of the reserve clause, which binds a player to a team.

"We think we can succeed without such clauses," said Davidson. In the event a WHA player wished to leave his club and join another in the league, his new team would have to give the old team a draft choice.

Davidson promised there would be no raiding of NHL players who are under long-term contracts. However, that wouldn't stop the WHA from trying to spirit away players who have only one-year deals with NHL clubs.

The WHA plans to have a players' association and a pension fund. As a further attraction, it will set up a three-man arbitration board to settle player-management salary impasses.

Ben Hatskin of Winnipeg, a businessman and president of his city's new club, sounded the WHA's warning cry when he said: "Let the NHL *try* to fight us. How can the NHL compete with us? We've already had 11 inches of snow on the ground. We're putting babies on ice skates. We're prepared to play hockey."

## The Scoreboard

**HORSE RACING**—At Melbourne, New Zealand's 4-year-old Silver Knight came from behind in the last two furlongs to win the $112,000 Melbourne Cup at Flemington. Silver Knight at odds of 10-1, was ridden by New Zealand jockey Bruce Marsh and carried 121 lbs. Time for 2-mile race over slow going was 2 minutes 19.5 seconds.

Another New Zealand 4-year-old, Igloo—112 lbs.—ridden by Ernie Didham, was a length and a half behind the winner to finish second.

The victory earned Silver Knight's owner, Sir Walter Norwood, $72,120.

At Laurel, Md., Riva Ridge stalked pace-setting Drum Fire to the head of the homestretch and then went on to win the $144,590 Laurel Futurity by 11 lengths at Laurel Race Course.

The Meadow Stable colt, a 1-to-10 favorite, returned $2.20 to win and $2.10 to place. There was no show betting in the 1 1/16-mile race for 2-year-olds.

The son of First Landing-Iberia, ridden by Ron Turcotte, earned $90,733 in capturing his fourth stakes of a brilliant eight-race career. The first-place money lifted the star 2-year-old's bank account to $326,929. Festive Mood finished second, and Drum Fire took third.

**ICE SKATING**—At London, East Berlin's Christine Errath gave a brilliant free skating performance to win the Richmond International Trophy competition, edging Canada's Cathy Lee Irwin. Miss Errath, will be 15 New Year's Eve.

The runner-up in the East German championships made up a 50-point deficit after the compulsory figures, jumping from fifth place to win by 36 points over Miss Irwin. The 19-year-old Japanese champion, Kazumi Yamashita, and Charlotte Walter, the 18-year-old Swiss title holder from Bern, finished third and fourth.

**SOCCER**—At Budapest, St. Johnstone of Scotland qualified for the third round of the European Football Union Cup despite being beaten, 1-0, by Vasas of Hungary in their second-round second-leg match. St. Johnstone won the first game, 2-0.

**CYCLING**—At Agua Caliente, Mexico, Holland continued to dominate the 18th annual Mexican tour when Jo Van Pol won the fourth lap—166 kilometers—in 4 minutes 17.58 seconds.

It was the fourth straight victory for Holland. Pedor Den Hertog continues to lead the tour.

**HOCKEY**—At Barcelona, Italy and France fought to a 2-2 tie in an exhibition match.

### Youth Wins Chess

MOSCOW, Nov. 2 (Reuters).—The youngest participant in the 1971 Soviet women's chess championship won the title yesterday, Tass news agency reported. Miss Irina Levitina, a 17-year-old mathematics student at Leningrad University, won the championship by 1.5 points.

## *Anti-Trust Suit Filed by Jones Against the NBA*

PHILADELPHIA, Nov. 2 (AP).—Philadelphia 76ers holdout Wally Jones yesterday filed an anti-trust suit seeking damages in excess of $5 million against the National Basketball Association.

Jones, 29, earned $45,000 last season but is presently under suspension and earning no salary after failing to come to terms this season.

The suit is primarily an attack on the NBA's reserve clause, which binds a player to a club until he is traded or retires. The suit also attacks the player draft system and the proposed merger of the NBA with the American Basketball Association.

# Count Sees Red

By Russell Baker

WASHINGTON. — General Count Dracula, controversial military dictator of the Democratic Republic of Terror del Luna, arrived in Washington Saturday night via his personal monogramed jet coffin.

Baker

As may be imagined, American officials are extremely scared. The general, as even the Pentagon concedes, is not the most savory dictator on the free-world team. People with long memories still recall his scandalous behavior at a state dinner at the White House during his official visit here in the 1940s.

In fact, it was that dinner that got the Washington police into the custom of keeping a close eye on social events at the White House.

Fortunately, General Count Dracula has not come fishing for a dinner invitation this time. He is here to find out how the United States proposes to finance him now that the Senate has killed the foreign-aid bill.

"If the usual payments are not forthcoming," he told a midnight press backgrounder at the Anacostia abattoir, "there will be no alternative for Terror del Luna except to go Communist."

"Is that a threat, general?" a newsman asked.

"Call me count," he replied, "so that we may understand each other better. Generals perhaps may make threats, but what a count says can be counted on."

"Counted on what, count?" the newsman persisted. "Can it be counted on the fingers of both hands?"

The general, who is not accustomed to a free press, did not realize that this question was just the reporter's way of getting a story for the public.

* * *

In fact, the question made him so angry that he turned himself into a bat and flew into the streets of downtown Washington looking for somebody to bite. There he was mugged—or "webbed," to use the correct police term for a bat mugging—and almost raped before he could turn himself into a general and claim his diplomatic immunity.

General Count Dracula's irritation with Washington has sent a tremor through the Pentagon and the State Department, as well as the newspaper columnists of Washington, for Terror del Luna is the country that anchors the south-by-southeast flank of the B.I.M.B.O. mutual defense line against Communism's design to break into the strategic Lunatic Archipelago.

Both the Pentagon and the State Department knew that if Terror del Luna abandons the free-world team, Washington newspaper columnists will need something new to write about the B.I.M.B.O. defense pact, and this will require everybody to think.

Not surprisingly then, people at Washington's highest thinking levels now believe it essential to maintain the situation on B.I.M.B.O.'s south-by-southeastern flank exactly as it has always been since 1903, when Major Count Dracula overthrew the democratic government there in order to avert a Communist take-over.

Shortly after assuming power, the major promised that he would return Terror del Luna to democratic rule just as soon as he was promoted to lieutenant colonel.

By that time, however, the population had declined so precipitously that democracy was no longer possible. As Lieutenant Colonel Count Dracula told the American ambassador in 1919, democracy meant majority rule, and since the majority of the population was dead, he had no alternative but to continue the dictatorship until he could earn his silver eagles.

Now, however, with the Senate's vote threatening an end to the entire foreign-aid program, the free world's safe anchor on the south-by-southeast flank of B.I.M.B.O. is threatened. Without U.S. dollars, General Count Dracula will be unable to buy the fantastically expensive new strategic peopleware he needs to maintain Terror del Luna's population at a nourishing level over the coming year.

Contributions are desperately needed. Mail your people, parcel post, to the State Department now, while there is still time.

*According to the listing of government-sought products, people who brush their teeth courtesy of Uncle Sam use Pepsodent. They wash their hands with Sunlight soap . . . or Borax and use Sheffield safety razors and blades.*

# Uncle Sam's Shopping List

By Carole Shifrin

WASHINGTON (WP).—Uncle Sam uses Bab-O in his kitchen, Sani-Flush in his bathroom, and Commander's sheets in his bedroom.

This glimpse into the federal government's buying habits was provided by a long-awaited list of brand-name consumer products it buys. The list of nearly 350 items purchased and tested for government use was made available to the public last week by the General Services Administration, the government's civilian buyer.

The 44-page list includes such relatively inexpensive items as Scripto mechanical pencils and Ray-O-Vac flashlight batteries as well as major-expense appliances such as air conditioners and clothes washers and dryers. Specific model numbers are listed for each.

## Free

It is available free from the 27 federal information centers located in metropolitan areas throughout the country or by writing to Consumer Product Information, Washington, D.C. 20407.

The government has long been urged to make available the information it acquires through its own buying and testing. The government resisted, claiming that it wouldn't be fair and that very often the products it buys and tests do not correspond to items the consumer could find in the market-place. But last year, President Nixon said that such information should be made available to the public "in a manner that is useful to consumers."

In making the list available last week, GSA Administrator Robert L. Kunzig cautioned that the listing of a brand name did not constitute an "endorsement."

"Nor does it imply that other manufacturers do not have products of equal or better quality," he said.

He pointed out that some manufacturers may not even bid on a contract while others are unsuccessful in the bidding process because of factors other than product quality, such as price. In addition, the government tests only the products of successful bidders so that products from manufacturers who chose not to bid or who lost out in the process might be as good or better than those the government did buy.

"We are anxious to share what information we have, but as we have repeatedly stressed, we don't have the competitive brand test data that some people think we have," Mr. Kunzig said.

Nevertheless, all the items bought by the government are tested prior to acceptance to assure that they meet government specifications, presumably high standards.

## Needs

Mr. Kunzig noted that, in most cases, the needs of the government and the consumer would be the same, although the former might not care about some things a consumer might be more interested in, such as color, convenience of installation, and safety around children.

According to the listing of government-sought products, people who brush their teeth courtesy of Uncle Sam use Pepsodent. They wash their hands with Sunlight soap (made by Lever Brothers) or Borax and use Sheffield safety razors and blades. If cut shaving, there are adhesive and gauze bandage by White Cross.

Some of the brands used by the government are not well known, such as K-Det laundry detergent, chlorine bleach, dishwasher detergent, and detergent for cleaning painted surfaces (supplied by Washington Chemical Sales of California) and Solventol No. 201 dishwasher detergent (supplied by Solventol Chemical Products Co.).

Other cleaning products used by the government include Sparkler HO detergent for cleaning tile and floors supplied by Solventol and GBS toilet bowl cleaner from Jones-Hamilton Co. The government is provided with three different kinds of scouring pads: Golden Fleece Scour Cloths, Scotch-Brite Brand No. 96, and Handy Mandy Pot Cleaners. For polishing wood or metal furnitures, there are Amazon Wax and Mirid R-32 Wax, and Uni-Pol UP-10 oil. For polishing floors, there is Tuffsheen floor wax. For polishing shoes, there is Cadet shoe polish.

For most of its brooms and brushes, the government buys "Skilcraft" Quality Blind-Made Products outright—not on a competitive-bid basis—from several centers for the blind. Uncle

Sam also purchases "Skilcraft" door mats and ironing board pads and covers.

The government's major appliance purchases are all well-known brand names. It buys two General Electric Co. models and 14 different Fedders Corp. window air conditioners; Proctor-Silex irons; and GE and Whirlpool washing machines and dryers. Uncle Sam has been buying Wren alarm clocks, Sunbeam wall clocks, Hamilton wrist watches, and a variety of Mario household lamps.

## Floors

For its floors, the government buys Karastan-Madreau heavy duty acrylic and Karastan-Brieau nylon rugs made by Karastan Rug Mills of Eden, N. C.; Apollo wool and nylon rugs made by Seamloc; Loma-Loom Carpet Co. of Sanford, Maine; Town and Terrace polypropylene carpet for indoor-outdoor use, made by Ozite Corp. of Anaheim, Calif.; and federal sponge or foam rubber carpet cushion made by Allen Industries of Compton, Calif. Also on the list is floor tile made by Kentile Floors, GAF Corp., Armstrong Cork Co., and American Biltrite Rubber, and rolled linoleum made by Armstrong.

Kunzig said the listings were being put out on a "trial basis" and that the government would be guided by the comments received from consumers and business about whether the information is "helpful and appropriate." Present plans call for updating the list every three months.

---

# PEOPLE: *Son and 2 Sue Fox for $22 Mi*

**Richard Zanuck**, ousted president of 20th Century-Fox film studios, and two other plaintiffs sued his father, **Darryl Zanuck**, and other Fox executives Monday for $22,282,000. The Los Angeles superior court suit says the younger Zanuck, his actress wife, **Linda Harrison**, and the Fox vice-president in charge of story operations, **David Brown**, were wrongfully fired from their jobs late last year. The 39-page claim also alleges defamation and intentional infliction of emotional distress. Richard Zanuck, 37, was ousted as president Dec. 29 in a father-son rift that reportedly grew out of jealousy about who was boss. The troubles at Fox stemmed from its sad financial condition in the current downturn in motion picture fortunes. The elder Zanuck was chairman of the board at the time. He is now Fox's chairman emeritus. Shortly after his firing, young Zanuck and Brown joined rival Warner Bros.

At the age of 28, young Zanuck took charge of the Fox lot and bailed the studio out of financial trouble with a series of hit pictures, including the greatest profit-maker of them all, "The Sound of Music," and "Butch Cassidy and the Sundance Kid," "Patton" and "M*A*S*H." But in recent years the studio put out a series of losing pictures and the responsibility fell on young Zanuck.

* * *

Still in court, but moving to New York, where the producers of the motion picture "Bunny O'Hare" Monday countered a $5 million suit brought by the film's star, **Bette Davis**, with a $17.5 million damage action against the actress. Miss Davis contended the producers, American International Pictures, Inc., and American International Productions, Inc., had, without her consent, altered the script and edited the finished film so that it became a "broad, tastelesss and inartistically assembled slapstick production." The producers challenged the actress's claim and said her remarks had "seriously diminished, if not destroyed, the picture's chances of becoming a commercial and artistic success."
